## News

- 15 **Grid Computing's Future**  
Outreach programs and usability improvements are drawing many researchers to grid computing from disciplines that have not traditionally used such resources.  
*By Kirk L. Kroeker*
- 
- 18 **Twitter as Medium and Message**  
Researchers are mining Twitter's vast flow of data to measure public sentiment, follow political activity, and detect earthquakes and flu outbreaks.  
*By Neil Savage*
- 
- 21 **Evaluating Government Funding**  
Presidential report asserts the value of U.S. government funding and specifies areas needing greater focus.  
*By Tom Geller*
- 
- 22 **Memristors: Pass or Fail?**  
The device may revolutionize data storage, replacing flash memory and perhaps even disks. Whether they can be reliably and cheaply manufactured, though, is an open question.  
*By Gary Anthes*
- 
- 25 **Gary Chapman, Technologist: 1952-2010**  
He raised important public issues, such as the impact of computers and the Internet on society, and encouraged social responsibility for computer professionals.

**About the Cover:**  
Artist/photographer Eric Fischer created the Geotaggers' World Atlas by collected geographical data from Flickr photos, revealing where people take pictures in major cities around the world. Each city was ranked on the density of photographs taken around its center; our cover image of New York City topped the list.
