

The online article is the official version and may contain additional content not available in this print issue. To access the full article, including multimedia, enhanced figures, auxiliary materials, and other associated content, go to <http://www.agu.org/journals/gl>.

i Highlights of This Issue

Space Sciences

- L19108** *Hyosub Kil and Larry J. Paxton*
The origin of the nonmigrating tidal structure in the column number density ratio of atomic oxygen to molecular nitrogen (doi 10.1029/2011GL049432)
- L19101** *Shun-Rong Zhang, John C. Foster, Anthea J. Coster, and Philip J. Erickson*
East-West Coast differences in total electron content over the continental US (doi 10.1029/2011GL049116)
- L19102** *T. Dudok de Wit and S. Bruinsma*
Determination of the most pertinent EUV proxy for use in thermosphere modeling (doi 10.1029/2011GL049028)
- L19103** *W. M. Macek, A. Wawrzaszek, and V. Carbone*
Observation of the multifractal spectrum at the termination shock by Voyager 1 (doi 10.1029/2011GL049261)
- L19104** *W. Liu, T. E. Sarris, X. Li, Q.-G. Zong, R. Ergun, V. Angelopoulos, and K. H. Glassmeier*
Spatial structure and temporal evolution of a dayside poloidal ULF wave event (doi 10.1029/2011GL049476)
- L19105** *P. M. Atkinson, J. Dash, and C. Jeganathan*
Amazon vegetation greenness as measured by satellite sensors over the last decade (doi 10.1029/2011GL049118)
- L19106** *M. J. Owens, M. Lockwood, L. Barnard, and C. J. Davis*
Solar cycle 24: Implications for energetic particles and long-term space climate change (doi 10.1029/2011GL049328)
- L19107** *P. A. Bernhardt, C. A. Selcher, and S. Kowtha*
Electron and ion Bernstein waves excited in the ionosphere by high power EM waves at the second harmonic of the electron cyclotron frequency (doi 10.1029/2011GL049390)
- L19109** *Y.-D. Jia, C. T. Russell, K. K. Khurana, H. Y. Wei, Y. J. Ma, J. S. Leisner, A. M. Persoon, and M. K. Dougherty*
Cassini magnetometer observations over the Enceladus poles (doi 10.1029/2011GL049013)

Planets

- L19201** *Peter M. Grindrod and Stephen A. Fawcett*
Possible climate-related signals in high-resolution topography of lobate debris aprons in Tempe Terra, Mars (doi 10.1029/2011GL049295)
- L19202** *M. I. Zimmerman, W. M. Farrell, T. J. Stubbs, J. S. Halekas, and T. L. Jackson*
Solar wind access to lunar polar craters: Feedback between surface charging and plasma expansion (doi 10.1029/2011GL048880)
- L19203** *Dimitra Atri and Adrian L. Melott*
Biological implications of high-energy cosmic ray induced muon flux in the extragalactic shock model (doi 10.1029/2011GL049027)
- L19204** *O. Santolik, D. A. Gurnett, G. H. Jones, P. Schippers, F. J. Crary, J. S. Leisner, G. B. Hospodarsky, W. S. Kurth, C. T. Russell, and M. K. Dougherty*
Intense plasma wave emissions associated with Saturn's moon Rhea (doi 10.1029/2011GL049219)

Solid Earth

- L19301** *Akito Tsutsumi, Olivier Fabbri, Anne Marie Karpoff, Kohtaro Ujiie, and Atsushi Tsujimoto*
Friction velocity dependence of clay-rich fault material along a megasplay fault in the Nankai subduction zone at intermediate to high velocities (doi 10.1029/2011GL049314)

- L19302** *Mai-Linh Doan and Andrea Billi*
High strain rate damage of Carrara marble (doi 10.1029/2011GL049169)
- L19303** *F. Pétrelis, J. Besse, and J.-P. Valet*
Plate tectonics may control geomagnetic reversal frequency (doi 10.1029/2011GL048784)
- L19304** *Leland J. O'Driscoll, Eugene D. Humphreys, and Brandon Schmandt*
Time corrections to teleseismic P delays derived from SKS splitting parameters and implications for western U.S. P-wave tomography (doi 10.1029/2011GL049031)
- L19305** *Jennifer E. Georgan*
Lithospheric control on the spatial pattern of Azores hotspot seafloor anomalies: Constraints from a model of plume-triple junction interaction (doi 10.1029/2011GL048742)
- L19306** *Shiann-Jong Lee, Bor-Shouh Huang, Masataka Ando, Hung-Chie Chiu, and Jeen-Hwa Wang*
Evidence of large scale repeating slip during the 2011 Tohoku-Oki earthquake (doi 10.1029/2011GL049580)
- L19307** *Yuji Yagi and Yukitoshi Fukahata*
Rupture process of the 2011 Tohoku-oki earthquake and absolute elastic strain release (doi 10.1029/2011GL048701)
- L19308** *J. G. Shellnutt, G. M. Bhat, M. E. Brookfield, and B.-M. Jahm*
No link between the Panjal Traps (Kashmir) and the Late Permian mass extinctions (doi 10.1029/2011GL049032)
- L19309** *V. Stagno, Y. Tange, N. Miyajima, C. A. McCammon, T. Irifune, and D. J. Frost*
The stability of magnesite in the transition zone and the lower mantle as function of oxygen fugacity (doi 10.1029/2011GL049560)
- L19310** *S. De Angelis and S. M. Henton*
On the feasibility of magma fracture within volcanic conduits: Constraints from earthquake data and empirical modelling of magma viscosity (doi 10.1029/2011GL049297)

Hydrology and Land Surface Studies

- L19401** *A. Antico and D. M. Kröhlting*
Solar motion and discharge of Paraná River, South America: Evidence for a link (doi 10.1029/2011GL048851)

Corrections

- L19402** *V. Nieves, J. Wang, and R. L. Bras*
Correction to "Statistics of multifractal processes using the maximum entropy method" (doi 10.1029/2011GL049786)

The Cryosphere

- L19501** *Gunnar Spreen, Ron Kwok, and Dimitris Menemenlis*
Trends in Arctic sea ice drift and role of wind forcing: 1992–2009 (doi 10.1029/2011GL048970)
- L19502** *Adam J. Campbell, Edwin D. Waddington, and Stephen G. Warren*
Refugium for surface life on Snowball Earth in a nearly-enclosed sea? A first simple model for sea-glacier invasion (doi 10.1029/2011GL048846)
- L19503** *M. Morlighem, E. Rignot, H. Seroussi, E. Larour, H. Ben Dhia, and D. Aubry*
A mass conservation approach for mapping glacier ice thickness (doi 10.1029/2011GL048659)
- L19504** *Michael Lehning, Thomas Grünwald, and Michael Schirmer*
Mountain snow distribution governed by an altitudinal gradient and terrain roughness (doi 10.1029/2011GL048927)

Oceans

- L19601** *Mana Hikami, Hiroyuki Ushie, Takahiro Irie, Kazuhiko Fujita, Azumi Kuroyanagi, Kazuhiko Sakai, Yukihiro Nojiri, Atsushi Suzuki, and Hodaka Kawahata*
Contrasting calcification responses to ocean acidification between two reef foraminifers harboring different algal symbionts (doi 10.1029/2011GL048501)

- L19602** *Jeremy T. Mathis, Jessica N. Cross, and Nicholas R. Bates*
The role of ocean acidification in systemic carbonate mineral suppression in the Bering Sea
 (doi 10.1029/2011GL048884)
- L19604** *Jean-Carlos Montero-Serrano, Norbert Frank, Christophe Colin, Claudia Wienberg, and Markus Eisele*
The climate influence on the mid-depth Northeast Atlantic gyres viewed by cold-water corals
 (doi 10.1029/2011GL048733)
- L19605** *Atsuko Yamazaki, Tsuyoshi Watanabe, and Urumu Tsunogai*
Nitrogen isotopes of organic nitrogen in reef coral skeletons as a proxy of tropical nutrient dynamics
 (doi 10.1029/2011GL049053)
- L19606** *Boaz Luz and Eugeni Barkan*
Proper estimation of marine gross O₂ production with ¹⁷O/¹⁶O and ¹⁸O/¹⁶O ratios of dissolved O₂
 (doi 10.1029/2011GL049138)
- L19607** *A. Rubio, G. Reverdin, A. Fontán, M. González, and J. Mader*
Mapping near-inertial variability in the SE Bay of Biscay from HF radar data and two offshore moored buoys (doi 10.1029/2011GL048783)
- L19608** *Kelin Hu and Qin Chen*
Directional spectra of hurricane-generated waves in the Gulf of Mexico (doi 10.1029/2011GL049145)

Corrections

- L19603** *Prasad G. Thoppil, James G. Richman, and Patrick J. Hogan*
Correction to "Energetics of a global ocean circulation model compared to observations"
 (doi 10.1029/2011GL049632)

Climate

- L19701** *A. E. Dessler*
Cloud variations and the Earth's energy budget (doi 10.1029/2011GL049236)
- L19704** *Michael Toomey, Dar A. Roberts, Christopher Still, Michael L. Goulden, and Joseph P. McFadden*
Remotely sensed heat anomalies linked with Amazonian forest biomass declines (doi 10.1029/2011GL049041)
- L19702** *Chunzai Wang, Hailong Liu, Sang-Ki Lee, and Robert Atlas*
Impact of the Atlantic warm pool on United States landfalling hurricanes (doi 10.1029/2011GL049265)
- L19703** *Guiling Wang, Shanshan Sun, and Rui Mei*
Vegetation dynamics contributes to the multi-decadal variability of precipitation in the Amazon region
 (doi 10.1029/2011GL049017)
- L19706** *Jung-Eun Lee, Benjamin R. Lintner, C. Kevin Boyce, and Peter J. Lawrence*
Land use change exacerbates tropical South American drought by sea surface temperature variability
 (doi 10.1029/2011GL049066)

Corrections

- L19705** *D. M. Thompson, T. R. Ault, M. N. Evans, J. E. Cole, and J. Emile-Geay*
Correction to "Comparison of observed and simulated tropical climate trends using a forward model of coral $\delta^{18}\text{O}$ " (doi 10.1029/2011GL049656)

Atmospheric Science

- L19801** *A. Martin and T. N. Krishnamurti*
The role of storm-relative advection of absolute angular momentum in strengthening of Atlantic tropical cyclones (doi 10.1029/2011GL048910)
- L19802** *L. Garcia-Carreras and D. J. Parker*
How does local tropical deforestation affect rainfall? (doi 10.1029/2011GL049099)
- L19803** *Katrina S. Virts, Joel A. Thornton, John M. Wallace, Michael L. Hutchins, Robert H. Holzworth, and Abram R. Jacobson*
Daily and intraseasonal relationships between lightning and NO₂ over the Maritime Continent
 (doi 10.1029/2011GL048578)

- L19804** *Erika von Schneidemesser, Paul S. Monks, Valerie Gros, Julie Gauduin, and Olivier Sanchez*
How important is biogenic isoprene in an urban environment? A study in London and Paris
(doi 10.1029/2011GL048647)
- L19805** *Emmanuel Villermaux and Fabien Eloi*
The distribution of raindrops speeds (doi 10.1029/2011GL048863)
- L19806** *Lieven Clarisse, Michael Fromm, Yasmine Ngadi, Louisa Emmons, Cathy Clerbaux, Daniel Hurtmans, and Pierre-François Coheur*
Intercontinental transport of anthropogenic sulfur dioxide and other pollutants: An infrared remote sensing case study (doi 10.1029/2011GL048976)
- L19807** *J. B. Johnson, R. O. Arechiga, R. J. Thomas, H. E. Edens, J. Anderson, and R. Johnson*
Imaging thunder (doi 10.1029/2011GL049162)

Special Sections in Progress
