

INTERNATIONAL JOURNAL OF COMPUTATIONAL METHODS

Vol. 8, No. 1 (March 2011)

CONTENTS

- A Numerical Simulation of Convective Flow in the Solidification Process 1
A. I. N. Korti
- Modeling Thermophysical Properties of Noble Gas Involved Mixtures 19
*M. M. Papari, J. Moghadasi, S. Nikmanesh, E. Hosseini
and A. Boushehri*
- Application of Point Interpolation Method in Jointed Rock Mass 41
M. Hajiazizi and M. R. Ashory
- Application of Boundary Element Method for 3D Wave Scattering
in Cylinders 57
H. Bai and A. H. Shah
- Limit Cycle Oscillation Prediction and Control Design Method for
Aeroelastic System Based on New Nonlinear Reduced Order Model 77
G. Chen, Y.-M. Li and G.-R. Yan
- An Error Estimator and Adaptivity Based on Basis Coefficient-Vector
Field of Element-Free Galerkin Method 91
R. Sethuraman and J. V. Hormis
- Meshfree Collocation Method for Implicit Time Integration of ODEs 119
H. Netuzhylov and A. Zilian
- New Three-Step Iterative Method for Solving Mixed Variational
Inequalities 139
A. Bnouhachem, M. A. Noor, Z. Sheng and E. Al-Said
