

INTERNATIONAL JOURNAL OF COMPUTATIONAL METHODS

Vol. 8, No. 2 (June 2011)

Special Issue on Analysis of Discontinuous Deformation: New Developments and Applications

Edited by: **Guowei Ma and Zhiye Zhao**

CONTENTS

Preface	v
Use of Discontinuous Deformation Analysis to Evaluate the Dynamic Behavior of Submarine Tsunami-Generating Landslides in the Marmara Sea <i>G. C. Ma, F. Kaneko, S. Hori and M. Nemoto</i>	151
New Contact-Definition Algorithm Using Inscribed Spheres for 3D Discontinuous Deformation Analysis <i>T.-Y. Ahn and J.-J. Song</i>	171
Discontinuous Deformation Analysis Based on Variational Inequality Theory <i>W. Jiang and H. Zheng</i>	193
High Rock Slope Stability Analysis Using the Enriched Meshless Shepard and Least Squares Method <i>H. H. Zhu, X. Y. Zhuang, Y. C. Cai and G. W. Ma</i>	209
Study on the Formation Mechanism of Tangjiashan Landslide Triggered by Wenchuan Earthquake Using DDA Simulation <i>A. Q. Wu, Q. G. Yang, G. S. Ma, B. Lu and X. J. Li</i>	229
Stability Analyses for Ancient Masonry Structures Using Discontinuous Deformation Analysis and Numerical Manifold Method <i>T. Sasaki, I. Hagiwara, K. Sasaki, R. Yoshinaka, Y. Ohnishi, S. Nishiyama and T. Koyama</i>	247
Tunnel Blasting Simulations by the Discontinuous Deformation Analysis <i>Z. Y. Zhao, Y. Zhang and H. R. Bao</i>	277
Hereditary Problems in Long-Wall Mining by Free Hexagons <i>P. P. Prochazka and T. S. Lok</i>	293
Arbitrary Discontinuities in the Numerical Manifold Method <i>X. M. An, G. W. Ma, Y. C. Cai and H. H. Zhu</i>	315
