

CONTENTS

VOLUME 67 ISSUE No. 11	20 December 2011
Simultaneous effects of heat and mass transfer on time-dependent flow over a stretching surface: T. Hayat and M. Awais	1341
Numerical studies of the fingering phenomena for the thin film equation: Y. Li, H. G. Lee, D. Yoon, W. Hwang, S. Shin, Y. Ha and J. Kim	1358
Adaptive Lagrangian–Eulerian computation of propagation and rupture of a liquid plug in a tube: Ez A. Hassan, E. Uzgoren, H. Fujioka, J. B. Grotberg and W. Shyy	1373
Viscous flow in a mixed compression intake: V. M. K. Kottedda and S. Mittal	1393
Mixed convection flow of a micropolar fluid with radiation and chemical reaction: T. Hayat, S. A. Shehzad and M. Qasim	1418
Very large-scale computation of very small-scale motions in a fully developed pipe flow: K. Hmoudou, W. Allan, K. Goni Boulama and X. Wu	1437
Compressible air flow through a collapsing liquid cavity: S. Gekle and J. M. Gordillo	1456
Re-examining the QUICKEST algorithm for two-dimensional incompressible fluids: S. Le	1470
Variable viscosity effects on the peristaltic motion of a third-order fluid: T. Hayat and F. M. Abbasi	1500
Advances in the simulation of multi-fluid flows with the particle finite element method. Application to bubble dynamics: M. Mier-Torrecilla, S. R. Idelsohn and E. Oñate	1516
Spectral p -multigrid discontinuous Galerkin solution of the Navier–Stokes equations: F. Bassi, N. Franchina, A. Ghidoni and S. Rebay	1540
Using adjoint error estimation techniques for elastohydrodynamic lubrication line contact problems: D. E. Hart, M. Berzins, C. E. Goodyer and P. K. Jimack	1559
A high-precision unstructured adaptive mesh technique for gas–liquid two-phase flows: K. Ito, T. Kunugi and H. Ohshima	1571
Effects of heat and mass transfer on peristaltic flow of Williamson fluid in a non-uniform channel with slip conditions: T. Hayat and S. Hina	1590

(continued from previous page)

An <i>hp</i> -adaptive discontinuous Galerkin method for shallow water flows: C. Eskilsson	1605
Magnetohydrodynamic effects on blood flow through an irregular stenosis: I. Abdullah, N. Amin and T. Hayat	1624
A direct reinitialization approach of level-set/splitting finite element method for simulating incompressible two-phase flows: M. H. Cho, H. G. Choi and J. Y. Yoo	1637
Numerical simulation of mass transfer to micropolar fluid flow past a stenosed artery: Md. A. Iqbal, S. Chakravarty, Sarifuddin and P. K. Mandal	1655
Peristaltic motion of an Oldroyd-B fluid in a channel with compliant walls: T. Hayat, M. Javed and N. Ali	1677
Thermal radiation effects on the flow and heat transfer in a liquid film on an unsteady stretching sheet: M. A. A. Mahmoud	1692
Shape optimization of a body located in incompressible flow using adjoint method and partial control algorithm: M. Sakamoto and M. Kawahara	1702
Lattice Boltzmann modeling of pore-scale fluid flow through idealized porous media: Y. Han and P. A. Cundall	1720
Incompact3d: A powerful tool to tackle turbulence problems with up to $O(10^5)$ computational cores: S. Laizet and N. Li	1735
SHORT COMMUNICATION	
On the discontinuous Galerkin computation of <i>N</i> -waves focusing: A. Sescu and A. A. Afjeh . . .	1758
