Taking a closer look at coatings

Restoring is better than repairing. Original ABB parts restore my turbo-charger performance.

Power and productivity
for a better world™

ABB

Fuel is the majority of an engine's life cycle costs. 1% higher consumption can cost 80,000 dollars per year for every 10 MW. ABB Turbocharging original parts optimize fuel consumption and operational safety. www.abb.com/turbocharging

26-60 Features

Feature 1 Paints & coatings

26-27 Chemical ally

Feature 2 Classification

- 30 Class voices its modal shift concerns
- 32-36 Structural safety assessment of very large ore carriers
- 38-40 Russians gear up for offshore oil revolution

Feature 3 Bulk carriers

- 42-45 BV focuses on improving efficiency
- 46 Order for Deltamarin's B Delta design
- 48-50 Cargotec MacGregor eases the flow
- 52-53 Taking the Northern Sea Route

Feature 4 South America

- 54-55 Brazil growth explosion
- 56 Ulstein keeps up Brazilian orders
- 58-59 Complex coupled model tests for Petrobras
- 59-60 Aker connects with the Brazilian market

On-line Edition

The Royal Institution of Naval Architects is proud to announce that as of January this year, *Shiprepair and Conversion Technology* journal has gone digital. We are very pleased to inform the maritime industry that each issue will be published online, on the RINA website. Visit www.rina.org.uk/srct and click on the issue cover you wish to view. This means that the entire publication, including all editorials and advertisements in the printed edition, can be seen in digital format and viewed by members, subscribers, and (for a limited time) any other interested individuals worldwide.
