

COASTAL ENGINEERING JOURNAL

Volume 53 • No. 2 • June 2011

CONTENTS

A Three-Dimensional Numerical Simulation of Wave and Current Evolving over a Submerged Shoal	63
<i>J. Choi and S. B. Yoon</i>	
Predicting Extreme Wave Run-Up on Natural Beaches for Coastal Planning and Management	87
<i>A. Mather, D. Stretch and G. Garland</i>	
Plotting-Position Estimator for the <i>L</i> -Moment Method and Quantile Confidence Interval for the GEV, GPA, and Weibull Distributions Applied for Extreme Wave Analysis	111
<i>Y. Goda</i>	
Wave Transformation over an Elliptic Shoal on a Sloping Bottom	151
<i>C.-M. Hsu and S.-S. Hsiao</i>	
Erratum	
Experimental Study of the Development of Scour and Backfilling	177
<i>P. A. Hartwig, J. M. Thomsen, P. Frigaard and T. L. Andersen</i>	

This journal is covered in SciSearch[®] (also known as Science Citation Index-Expanded), ISI Alerting Services (includes Research Alert[®]), Cambridge Scientific Index, Environment Abstracts, CSA Selected Water Resources Abstracts, CSA Oceanic Abstracts, CSA Health and Safety Abstracts, CSA Aquatic Sciences and Fisheries Abstracts (ASFA), Current Contents[®]/Engineering, Computing and Technology, and Compendex.
