ARTICLES

- The distribution of the Chironomidae (Insecta: Diptera) along multiple environmental gradients in lakes and ponds of the eastern Canadian Arctic
- A computational model for asynchronous oocyte growth dynamics in a batch-spawning fish
- Do exotic salmonids feed on native fauna after escaping from aquaculture cages in Tasmania, Australia?
- What drives dynamics in the Gulf of Alaska? Integrating hypotheses of species, fishing, and climate relationships using ecosystem modeling
- Weakened portfolio effect in a collapsed salmon population complex
- Sockeye salmon (*Oncorhynchus nerka*) return after an absence of nearly 90 years: a case of reversion to anadromy
- Bayesian fishable biomass dynamics models incorporating fished area and relative fish density
