

# Weather and Forecasting

## Contents

Vol. 26, No. 6, December 2011

### ARTICLES

- Improving Numerical Weather Predictions of Summertime Precipitation over the Southeastern United States through a High-Resolution Initialization of the Surface State ..... JONATHAN L. CASE, SUJAY V. KUMAR, JAYANTHI SRIKISHEN, AND GARY J. JEDLOVEC 785-807
- Mesocyclone Evolution Associated with Varying Shear Profiles during the 24 June 2003 Tornado Outbreak ..... PHILIP N. SCHUMACHER AND JOSHUA M. BOUSTEAD 808-827
- Multiscale Processes Leading to Supercells in the Landfalling Outer Rainbands of Hurricane Katrina (2005) ..... BENJAMIN W. GREEN, FUGING ZHANG, AND PAUL MARKOWSKI 828-847
- An Examination of Model Track Forecast Errors for Hurricane Ike (2008) in the Gulf of Mexico ..... MICHAEL J. BRENNAN AND SHARANYA J. MAJUMDAR 848-867
- Application of the WRF Hybrid ETKF-3DVAR Data Assimilation System for Hurricane Track Forecasts ..... XUGUANG WANG 868-884
- On the Rapid Intensification of Hurricane Wilma (2005). Part I: Model Prediction and Structural Changes ..... HUA CHEN, DA-LIN ZHANG, JAMES CARTON, AND ROBERT ATLAS 885-901
- Unexpected High Winds in Northern New Jersey: A Downslope Windstorm in Modest Topography ..... STEVEN G. DECKER AND DAVID A. ROBINSON 902-921
- Verification of a Multimodel Storm Surge Ensemble around New York City and Long Island for the Cool Season ..... TOM DI LIBERTO, BRIAN A. COLLE, NICKITAS GEORGAS, ALAN F. BLUMBERG, AND ARTHUR A. TAYLOR 922-939
- Convective Storm Structures and Ambient Conditions Associated with Severe Weather over the Northeast United States ..... KELLY A. LOMBARDO AND BRIAN A. COLLE 940-956
- Heavy Precipitation at the Alpine South Side and Saharan Dust over Central Europe: A Predictability Study Using TIGGE ..... LARS WIEGAND, ARWEN TWITCHETT, CORNELIA SCHWIERZ, AND PETER KNIPPERTZ 957-974
- Precipitation Forecasting Using Doppler Radar Data, a Cloud Model with Adjoint, and the Weather Research and Forecasting Model: Real Case Studies during SoWMEX in Taiwan ..... SHENG-LUN TAI, YU-CHIENG LIOU, JUANZHEN SUN, SHAO-FAN CHANG, AND MIN-CHAO KUO 975-992
- Hindcasting the January 2009 Arctic Sudden Stratospheric Warming with Unified Parameterization of Orographic Drag in NOGAPS. Part II: Short-Range Data-Assimilated Forecast and the Impacts of Calibrated Radiance Bias Correction ..... YOUNG-JOON KIM, WILLIAM CAMPBELL, AND BENJAMIN RUSTON 993-1007
- Experimental Tropical Cyclone Prediction Using the GFDL 25-km-Resolution Global Atmospheric Model ..... JEFFREY S. GALL, ISAAC GINIS, SHIAN-JIANN LIN, TIMOTHY P. MARCHOK, AND JAN-HUEY CHEN 1008-1019
- Simple Diagnosis of Tropical Cyclone Structure via Pressure Gradients ..... JOHN A. KNAFF, CHARLES R. SAMPSON, PATRICK J. FITZPATRICK, YI JIN, AND CHRISTOPHER M. HILL 1020-1031
- Diagnosing the Sensitivity of Binary Image Measures to Bias, Location, and Event Frequency within a Forecast Verification Framework ..... BENJAMIN R. J. SCHWEDLER AND MICHAEL E. BALDWIN 1032-1044
- The Meteorological Global Model GLOBO at the ISAC-CNR of Italy Assessment of 1.5 Yr of Experimental Use for Medium-Range Weather Forecasts ..... PIERO MALGUZZI, ANDREA BUZZI, AND OXANA DROFA 1045-1055
- Comparison of Raman Lidar Observations of Water Vapor with COSMO-DE Forecasts during COPS 2007 ..... CHRISTIAN HEROLD, DIETRICH ALTHAUSEN, DETLEF MÜLLER, MATTHIAS TESCHE, PATRIC SEIFERT, RONNY ENGELMANN, CYRILLE FLAMANT, ROHINI BHAWAR, AND PAOLO DI GIROLAMO 1056-1066
- The Potential for Seasonal Forecasting of Winter Wave Heights in the Northern North Sea ..... ANDREW W. COLMAN, ERIKA J. PALIN, MICHAEL G. SANDERSON, ROBERT T. HARRISON, AND IAN M. LEGGETT 1067-1074

## FORECASTERS' FORUM

Supercells in Environments with Atypical Hodographs ..... DAVID O. BLANCHARD 1075-1083

## NCEP NOTES

Assimilation of Tropical Cyclone Advisory Minimum Sea Level Pressure in the NCEP Global Data Assimilation System ..... DARYL T. KLEIST 1085-1091

CORRIGENDUM ..... ORESTE REALE, K. M. LAU, AND ARLINDO DA SILVA 1092-1092

PAPERS IN PRESS CAN BE VIEWED AS EARLY ONLINE RELEASES AT

## Publications of the American Meteorological Society

The *JOURNAL OF THE ATMOSPHERIC SCIENCES* publishes basic research related to the physics, dynamics, and chemistry of the atmosphere of Earth and other planets, with emphasis on the quantitative and deductive aspects of the subject.

The *JOURNAL OF APPLIED METEOROLOGY AND CLIMATOLOGY* publishes applied meteorological research related to physical meteorology, weather modification, satellite meteorology, radar meteorology, boundary layer processes, air pollution meteorology (including dispersion and chemical processes), agricultural and forest meteorology, and applied meteorological numerical models. The journal also covers applied climatological research related to the use of climate information in decision making, impact assessments, seasonal climate forecast applications and verification, climate risk and vulnerability, development of climate monitoring tools, urban and local climates, and climate as it relates to the environment and society.

*MONTHLY WEATHER REVIEW* publishes research results relevant to the analysis and prediction of observed atmospheric circulations and physics, including technique development, data assimilation, model validation, and relevant case studies. This includes papers on numerical and data assimilation techniques that apply to the atmosphere and/or ocean environments as well as socioeconomic analyses of the impacts of weather and weather forecasts. *MONTHLY WEATHER REVIEW* focuses on phenomena having seasonal and subseasonal time scales. Reviews of climatological aspects of high-impact events such as hurricanes, as well as review articles, are occasionally published.

The *JOURNAL OF PHYSICAL OCEANOGRAPHY* publishes research related to the physics of the ocean and to processes operating at its boundaries. Observational, theoretical, and modeling studies are all welcome, especially those that focus on elucidating specific physical processes. Papers that investigate interactions with other components of the earth system (e.g., ocean-atmosphere, physical-biological, and physical-chemical interactions) as well as studies of other fluid systems (e.g., lakes and laboratory tanks) are also invited, as long as their focus is on understanding the ocean or the ocean's role in the earth system.

The *JOURNAL OF ATMOSPHERIC AND OCEANIC TECHNOLOGY* publishes research describing instrumentation and methodologies used in atmospheric and oceanic research, including remote sensing instruments, measurements, validation, and data analysis techniques from satellites, aircraft, balloons, and surface-based platforms; in situ instruments, measurements, and methods for data acquisition, analysis, and interpretation; and information systems and algorithms.

*WEATHER AND FORECASTING* publishes research that can lead without appreciable delay to improvements in operational forecasting, through implementation of new forecasting techniques relevant to case studies of significant weather events, modeling approaches, and dissemination of important information to operational forecasters. The journal covers research on deterministic and ensemble forecasting and analysis techniques applied to all time scales, forecast verification and new verification approaches, and methods to better forecast major weather events. This includes submissions that report on the capabilities of the latest physics, numerics, and data assimilation approaches within numerical models, ensembles, and statistical postprocessing techniques; demonstrate the transfer of research results to the forecasting community; and illustrate the societal use and values of forecasts.

The *JOURNAL OF CLIMATE* publishes climate research and, therefore, welcomes manuscripts concerned with large-scale variability of the atmosphere, oceans, and land surface, including the cryosphere; past, present, and projected future changes in the climate system (including those caused by human activities); and climate simulation and prediction. Occasionally the *JOURNAL OF CLIMATE* will publish review articles on particularly topical areas. Such reviews must be approved by the Chief Editor prior to submission.

The *JOURNAL OF HYDROMETEOROLOGY* publishes research related to the modeling, observing, and forecasting of processes related to water and energy fluxes and storage terms, including interactions with the boundary layer and lower atmosphere, and including processes related to precipitation, radiation, and other meteorological inputs.

The *BULLETIN OF THE AMERICAN METEOROLOGICAL SOCIETY* publishes papers on historical and scientific topics that are of general interest to the AMS membership. It also publishes papers in areas of current scientific controversy and debate, as well as review articles.

*EARTH INTERACTIONS* publishes in the electronic medium original research in the earth system sciences with emphasis on interdisciplinary studies. Within this framework, the journal particularly encourages submissions that deal with interactions among the lithosphere, hydrosphere, atmosphere, and biosphere in the context of global issues or global change.

*WEATHER, CLIMATE, AND SOCIETY*, a new quarterly journal, publishes scientific research and analysis on the interactions of weather and climate with society. The journal encompasses economic, policy, institutional, social, behavioral, and international research, including mitigation and adaptation to weather and climate change. Articles may focus on a broad range of topics at the interface of weather and/or climate and society, including the socioeconomic, policy, or technological influences on weather and climate, the socioeconomic or cultural impacts of weather and climate, ethics and equity issues associated with weather, climate, and society, and the historical and cultural contexts of weather, climate, and society.

For information on becoming an AMS member and/or subscribing to the Society's journals, visit the AMS Web site: <http://www.ametsoc.org>.
