

4-635

Research on Mechanical Properties of 22MnB5 Steel Quenched in a SteelDie HE Lian-fang, ZHAO Guo-qun, LI Hui-ping, et al	129	Simulating Mechanical Behavior of Porous Materials by Homogenization Method YU Ning, ZHANG Wei-min	190
Effect of Remelting Current on Molten Pool Profile of Titanium AlloyIngot During Vacuum Arc Remelting Process YANG Zhi-jun, KOU Hong-chao ZHAO Xiao-hua, et al	133	Finite Element Simulation of Rod and Wire Continuous Rolling ZHANG Li-wen, YUE Chong-xiang YUAN Si-yu, et al	195
Integrated Fluid-Thermal-Structural Numerical Analysis for the Quenching of Metallic Components GAO Wei-min, FABIJANIC Daniel HILDITCH Tim, et al	137	Simulation of Large Forging Flat-Anvil Stretching Process and Its Optimization CHEN Kun, YANG Yi-tao, SHAO Guang-jie, et al	199
Numerical Simulation of Multi-pass Rolling Force and Temperature Field of Plate Steel During Hot Rolling ZENG Ben, WU Jing, ZHANG Heng-hua	141	Research on Voids Deformation Welding Condition for Manufacturing of Heavy Forgings HUANG Hua-gui, XU Shi-min, WANG Wei, et al	203
Numerical Simulation of Macrosegregation During Steel Ingot Solidification Using Continuum Model WANG Li, SHI Wei	145	Numerical Analysis of Material Properties in Deformation of Near Hemispherical Shells ZHAO Xiao, CHANG Hui, TANG Bin, et al	209
Numerical Analysis of Railway Brake Disc SAMEC Blaž, ODER Grega, LERHER Tone, et al	149	Asymmetric Deformation of Near Hemispherical Diaphragm Under Uniform Surface Load ZHANG Xu-hu, TANG Bin, LI Jin-shan, et al	214
Computer Modeling and Validations of Steel Gear Heat Treatment Processes Using Commercial Software DANTE LI Zhi-chao, FERGUSON B Lynn	152	Optimization of Pellet Production Process Parameters in Grate Using Simulation Results FENG Jun-xiao, ZHANG Yu, ZHENG Hai-wei, et al	219
Numerical Analysis of Unconventional Forging Process of Hollowed Shaft from Ti-6Al-4V Alloy GONTARZ Andrzej, PATER Zbigniew TOFIL Arkadiusz	157	Timed Quenching Process for Large-Scale AISI 4140 Steel Shaft ZUO Xun-wei, ZHOU Shu, CHEN Nai-lu, et al	224
Analysis of the Cross-Wedge Rolling Process of Toothed Shafts Made from 2618 Aluminium Alloy PATER Zbigniew, GONTARZ Andrzej TOFIL Arkadiusz	162	First-Principles Prediction of Ductility in $\beta$ -type Ti-Mo Binary Alloys LAI Min-jie, XUE Xiang-yi ZHOU Zhong-bo, et al	227
Calculation on the Incubation Period of Proeutectoid Ferrite Transformation for Si-Mn TRIPSteel TANG Guang-bo, PENG Ning-qi, LIU Zheng-dong	167	Finite Element Analysis on the Injection Molding and Productivity of Conformal Cooling Channel ZHENG Zhong, ZHANG Hai-ou WANG Gui-lan, et al	231
Explore the Possibility of Forming fcc High Entropy Alloys in Equal-Atomic Systems CoFeMnNiM and CoFeMnNiSmM ZHANG Chao-hui, LIN Mao-hua, WU Bo, et al	173	Characteristics of Flow Field Around an Underwater Projectile with Natural and Ventilated Cavitation GUO Jian-hong, LU Chuan-jing, CHEN Ying	236
Calculation on the Solid Solution Forming Enthalpies of Re-Mo-Ti Gradient Alloy in Thermodynamics YANG Shang-lei, LOU Song-nian	180	Reliability Research on Fatigue Life of Spots of Semi-submerged Drilling Unit YAN Yong-jian, XU Jin-quan	242
Monte Carlo Simulation of B2-L2 <sub>1</sub> Ordering Transitions in Au-Cu-Al Alloy Systems DING Hong, XU Bin, NI Chang, et al	186	A New Method Based on the Non-isothermal Kinetic Equation to Estimate the Critical Temperature of Thermal Explosion for Energetic Materials Using Non-isotherma IDSC ZHANG Hai, HU Jun-ying, HU Rong-zu, et al	247
		Research on the Method of Shipping Risk Early-Warning Based on Matter-Element Theory ZHANG Yu, WANG Bo, TAN Zhen-dong	252
