GALLERY OF FLUID MOTION

Introduction: 28th Annual Gallery of Fluid Motion (Long Beach, California, USA, 2010)

<i>(1 page)</i>	
Jeff D. Eldredge and Paul D. Ronney	091101
Global modes in a swirling jet undergoing vortex breakdown <i>(1 page)</i>	
C. Petz, H.-C. Hege, K. Oberleithner, M. Sieber, C. N. Nayeri, C. O. Paschereit, I. Wygnanski, and B. R. Noack	091102
Jets in viscous bubbles <i>(1 page)</i>	
T. Séon and A. Antkowiak	091103
Visualization of flow patterns past various objects in two-dimensional flow using soap film <i>(1 page)</i>	
Mohamed Fayed, Rocco Portaro, Amy-Lee Gunter, Hamid Ait Abderrahmane, and Hoi Dick Ng	091104
Non-coalescence of jets <i>(1 page)</i>	
Navish Wadhwa and Sunghwan Jung	091105
Non-axisymmetric impact creates pineapple-shaped cavity <i>(1 page)</i>	
Oscar R. Enríquez, Ivo R. Peters, Stephan Gekle, Laura E. Schmidt, Devaraj van der Meer, and Detlef Lohse	091106
Electro-worming: The behaviors of <i>Caenorhabditis (C.) elegans</i> in DC and AC electric fields <i>(1 page)</i>	
Han-Sheng Chuang, David M. Raizen, Nooreen Dabbish, and Haim H. Bau	091107
Liquid pearls <i>(1 page)</i>	
Nicolas Bremond, Enric Santanach-Carreras, and Jérôme Bibette	091108
Primary atomization of a liquid jet in crossflow <i>(1 page)</i>	
S. Rana and M. Herrmann	091109
The hungry fly: Hydrodynamics of feeding in the common house fly <i>(1 page)</i>	
Manu Prakash and Miles Steele	091110
Rush-hour in evaporating coffee drops <i>(1 page)</i>	
Álvaro G. Marín, Hanneke Gelderblom, Detlef Lohse, and Jacco H. Snoeijer	091111
Measuring oscillatory velocity fields due to swimming algae <i>(1 page)</i>	
Jeffrey S. Guasto, Karl A. Johnson, and J. P. Gollub	091112
Stability of a jet in crossflow <i>(1 page)</i>	
Miloš Ilak, Philipp Schlatter, Shervin Bagheri, Mattias Chevalier, and Dan S. Henningson	091113

LETTERS

Curvature singularity and film-skating during drop impact <i>(4 pages)</i>	
Laurent Duchemin and Christophe Josserand	091701
On the spectra of nozzle-exit velocity disturbances in initially nominally turbulent, transitional jets <i>(4 pages)</i>	
Christophe Bogey, Olivier Marsden, and Christophe Bailly	091702
Frictional slip lengths and blockage coefficients <i>(4 pages)</i>	
Darren Crowdy	091703
Kolmogorov similarity scaling for one-particle Lagrangian statistics <i>(4 pages)</i>	
Brian L. Sawford and P. K. Yeung	091704
The destabilization of an initially thick liquid sheet edge <i>(4 pages)</i>	
Henri Lhuissier and Emmanuel Villermaux	091705

ARTICLES

Biofluid Mechanics

- Three-dimensional numerical simulation of hydrodynamic interactions between pectoral-fin vortices and body undulation in a swimming fish** (12 pages)
Cheng-Lun Yu, Shang-Chieh Ting, Meng-Kao Yeh, and Jing-Tang Yang 091901

Micro- and Nanofluid Mechanics

- Microbubble formation and pinch-off scaling exponent in flow-focusing devices** (8 pages)
Wim van Hoeve, Benjamin Dollet, Michel Versluis, and Detlef Lohse 092001
- Ferrohydrodynamic pumping of a ferrofluid or electrohydrodynamic pumping of a polar liquid through a circular tube** (8 pages)
B. U. Felderhof 092002
- Efficiency of magnetic plane wave pumping of a ferrofluid through a planar duct** (4 pages)
B. U. Felderhof 092003

Interfacial Flows

- Stretching liquid bridges with moving contact lines: The role of inertia** (11 pages)
Shawn Dodds, Marcio Carvalho, and Satish Kumar 092101
- Low-Reynolds-number gravity-driven migration and deformation of bubbles near a free surface** (16 pages)
Franck Pigeonneau and Antoine Sellier 092102
- Fingering instability down the outside of a vertical cylinder** (11 pages)
Linda B. Smolka and Marc SeGall 092103

Viscous and Non-Newtonian Flows

- The effects of inhomogeneous boundary dilution on the coating flow of an anti-HIV microbicide vehicle** (9 pages)
Savas Tasoglu, Jennifer J. Peters, Su Chan Park, Stéphane Verguet, David F. Katz, and Andrew J. Szeri 093101
- Effect of axial and transverse magnetic fields on the flow behavior of ferrofluids featuring different levels of interparticle interaction** (7 pages)
M. Reindl and S. Odenbach 093102
- Regularized shock solutions in coating flows with small surface tension** (8 pages)
D. Badali, M. Chugunova, D. E. Pelinovsky, and S. Pollack 093103
- Relaxation of internal temperature and volume viscosity** (19 pages)
Domenico Bruno and Vincent Giovangigli 093104
- Hydrodynamic dispersion in open cell polymer foam** (10 pages)
Tyler R. Brosten, Sarah L. Codd, Robert S. Maier, and Joseph D. Seymour 093105

Particulate, Multiphase, and Granular Flows

- Preferential concentration and rise velocity reduction of bubbles immersed in a homogeneous and isotropic turbulent flow** (11 pages)
A. Aliseda and J. C. Lasheras 093301
- On particle spin in two-way coupled turbulent channel flow simulations** (9 pages)
Lihao Zhao and Helge I. Andersson 093302
- Instabilities in the homogeneous cooling of a granular gas: A quantitative assessment of kinetic-theory predictions** (8 pages)
Peter P. Mitrano, Steven R. Dahl, Daniel J. Cromer, Michael S. Pacella, and Christine M. Hrenya 093303
- Neutrally buoyant particle dynamics in fluid flows: Comparison of experiments with Lagrangian stochastic models** (15 pages)
Themistoklis P. Sapsis, Nicholas T. Ouellette, Jerry P. Gollub, and George Haller 093304

(Continued)

Instability and Transition

Accurate low dimensional models for deterministic fluid systems driven by uncertain forcing (13 pages)	
G. Dergham, D. Sipp, and J.-C. Robinet	094101
Homoclinic snaking of localized states in doubly diffusive convection (13 pages)	
Cédric Beaume, Alain Bergeon, and Edgar Knobloch	094102
Numerical investigation of the subcritical effects at the onset of three-dimensionality in the circular cylinder wake (11 pages)	
Tanvir Akbar, Gilles Bouchet, and Jan Dušek	094103
Secondary flow structures due to interaction between a finite-span synthetic jet and a 3-D cross flow (13 pages)	
Yossef Elimelech, Joseph Vasile, and Michael Amitay	094104
Investigation of the effect of external periodic flow pulsation on a cylinder wake using linear stability analysis (14 pages)	
Liang Lu and George Papadakis	094105
Numerical investigation of transitional flow over a rapidly pitching plate (15 pages)	
Daniel J. Garmann and Miguel R. Visbal	094106
Kelvin-Helmholtz instability in viscoelastic fluids in presence of electro-magnetic fields (11 pages)	
Amey S. Joshi, M. C. Radhakrishna, and N. Rudraiah	094107
Absolute-convective instability transition of low permittivity, low conductivity charged viscous liquid jets under axial electric fields (10 pages)	
Fang Li, Alfonso M. Gañán-Calvo, and José M. López-Herrera	094108
Linear and nonlinear convection in porous media between coaxial cylinders (11 pages)	
Carina Bringedal, Inga Berre, Jan M. Nordbotten, and D. Andrew S. Rees	094109
Side wall effects on the instability of thin gravity-driven films—From long-wave to short-wave instability (7 pages)	
Thilo Pollak, André Haas, and Nuri Aksel	094110
Quantitative analysis of the dripping and jetting regimes in co-flowing capillary jets (8 pages)	
María Luisa Cordero, François Gallaire, and Charles N. Baroud	094111
Experimental and analytical study of the shear instability of a gas-liquid mixing layer (12 pages)	
Jean-Philippe Matas, Sylvain Marty, and Alain Cartellier	094112

Turbulent Flows

Alternating half-loop shedding in the turbulent wake of a finite surface-mounted square cylinder with a thin boundary layer (15 pages)	
J. A. Bourgeois, P. Sattari, and R. J. Martinuzzi	095101
Control of the antisymmetric mode ($m = 1$) for high Reynolds axisymmetric turbulent separating/reattaching flows (19 pages)	
Pierre-Élie Weiss and Sébastien Deck	095102
Effect of turbulence on the downstream velocity deficit of a rigid sphere (4 pages)	
I. Eames, P. B. Johnson, V. Roig, and F. Risso	095103
Coherent structures in plasma-actuator controlled supersonic jets: Axisymmetric and mixed azimuthal modes (19 pages)	
D. V. Gaitonde and M. Samimy	095104
The equivalence of the Lagrangian-averaged Navier-Stokes-α model and the rational large eddy simulation model in two dimensions (8 pages)	
Balasubramanya T. Nadiga and Freddy Bouchet	095105
On the probability distribution function of the velocity field and its derivative in multi-scale turbulence (11 pages)	
Garrett H. Good and Zellman Warhaft	095106
Growth of a Richtmyer-Meshkov turbulent layer after reshock (15 pages)	
B. Thornber, D. Drikakis, D. L. Youngs, and R. J. R. Williams	095107

Local and nonlocal pressure Hessian effects in real and synthetic fluid turbulence

(9 pages)

Laurent Chevillard, Emmanuel Lévêque, Francesco Taddia, Charles Meneveau,
Huidan Yu, and Carlos Rosales 095108

Robust inverse energy cascade and turbulence structure in three-dimensional layers of fluid (6 pages)

D. Byrne, H. Xia, and M. Shats 095109

Effect of plumes on measuring the large scale circulation in turbulent Rayleigh-Bénard convection (11 pages)

Richard J. A. M. Stevens, Herman J. H. Clercx, and Detlef Lohse 095110

A streamwise-constant model of turbulent pipe flow (10 pages)

Jean-Loup Bourguignon and Beverley J. McKeon 095111

Compressible Flows**Electrostrictive fluid pressure from a laser beam (9 pages)**

Simen Å. Ellingsen and Iver Brevik 096101

Geophysical Flows**Experimental evidence of Alfvén wave propagation in a Gallium alloy (10 pages)**

Thierry Alboussière, Philippe Cardin, François Debray, Patrick La Rizza,
Jean-Paul Masson, Franck Plunian, Adolfo Ribeiro, and Denys Schmitt 096601

Breaking internal wave groups: Mixing and momentum fluxes (13 pages)

Daniel A. Birch and Miles A. Sundermeyer 096602

Experimental observation of standing interfacial waves induced by surface waves in muddy water (9 pages)

Eric Maxeiner and Robert A. Dalrymple 096603

Others**Dynamics of freely moving plates connected by a shallow liquid bridge (8 pages)**

Amir Gat, Homayun Navaz, and Morteza Gharib 097101
