

Monthly Weather Review

Contents

Vol. 139, No. 11, November 2011

ARTICLES

- ▶ **A Consistent Hybrid Variational-Smoothing Data Assimilation Method: Application to a Simple Shallow-Water Model of the Turbulent Midlatitude Ocean** MONIKA KRISTA, ERIC BLAYO, EMMANUEL COSME, AND JACQUES VERRON 3333–3347
- Exploring a Multiresolution Modeling Approach within the Shallow-Water Equations TODD D. RINGLER, DOUG JACOBSEN, MAX GUNZBURGER, LILI JU, MICHAEL DUDA, AND WILLIAM SKAMAROCK 3348–3368
- Four-Dimensional Assimilation of Multitime Wind Profiles over a Single Station and Numerical Simulation of a Mesoscale Convective System Observed during IHOP_2002 LEI ZHANG AND ZHAOXIA PU 3369–3388
- Assimilation of Stratospheric Temperature and Ozone with an Ensemble Kalman Filter in a Chemistry–Climate Model THOMAS MILEWSKI AND MICHEL S. BOURQUI 3389–3404
- Assessment of Assimilating ASCAT Surface Wind Retrievals in the NCEP Global Data Assimilation System LI BI, JAMES A. JUNG, MICHAEL C. MORGAN, AND JOHN F. LE MARSHALL 3405–3421
- Impact of CASA Radar and Oklahoma Mesonet Data Assimilation on the Analysis and Prediction of Tornadoic Mesovortices in an MCS ALEXANDER D. SCHENKMAN, MING XUE, ALAN SHAPIRO, KEITH BREWSTER, AND JIDONG GAO 3422–3445
- Analysis of a Tornadoic Mesoscale Convective Vortex Based on Ensemble Kalman Filter Assimilation of CASA X-Band and WSR-88D Radar Data NATHAN SNOOK, MING XUE, AND YOUNGSUN JUNG 3446–3468
- Performance of the Weather Research and Forecasting Model for Month-Long Pan-Arctic Simulations JOHN J. CASSANO, MATTHEW E. HIGGINS, AND MARK W. SEEFELDT 3469–3488
- Improved Representation of Boundary Layer Clouds over the Southeast Pacific in ARW-WRF Using a Modified Tiedtke Cumulus Parameterization Scheme CHUNXI ZHANG, YUQING WANG, AND KEVIN HAMILTON 3489–3513
- Sensitivities of Simulated Convective Storms to Environmental CAPE CODY KIRKPATRICK, EUGENE W. MCCAUL JR., AND CHARLES COHEN 3514–3532
- High-Resolution Simulations of Wintertime Precipitation in the Colorado Headwaters Region: Sensitivity to Physics Parameterizations CHANGHAI LIU, KYOKO IKEDA, GREGORY THOMPSON, ROY RASMUSSEN, AND JIMY DUDHIA 3533–3553
- Kalman Filter and Analog Schemes to Postprocess Numerical Weather Predictions LUCA DELLE MONACHE, THOMAS NIPEN, YUBAO LIU, GREGORY ROUX, AND ROLAND STULL 3554–3570
- Ensemble State Estimation for Nonlinear Systems Using Polynomial Expansions in the Innovation DANIEL HODYSS 3571–3588
- Marginalized Particle Filtering Framework for Tuning of Ensemble Filters VÁCLAV ŠMÍDL AND RADEK HOFMAN 3589–3599
- **A New Assessment of the Predictability of Tropical Cyclone Tracks** MATTHIEU PLU 3600–3608
- The Effect of Hawai'i's Big Island on Track and Structure of Tropical Cyclones Passing to the South and West CHRISTOPHER R. S. CHAMBERS AND TIM LI 3609–3627
- The Low-Level Atmospheric Circulation near Tongoy Bay–Point Lengua de Vaca (Chilean Coast, 30°S) DAVID A. RAHN, RENÉ D. GARREAU, AND JOSÉ A. RUTLLANT 3628–3647
- Prospects for Improving Subseasonal Predictions KATHY PEGION AND PRASHANT D. SARDESHMUKH 3648–3666
- On Peirce's Motivation for Equitability in Forecast Verification MARK J. RODWELL 3667–3669

▶ **Special Collection:** *Intercomparisons of 4D-Variational Assimilation and the Ensemble Kalman Filter*

■ **Special Collection:** *Targeted Observation, Data Assimilation, and Tropical Cyclone Predictability*
