## Contents

Vol. 139, No. 3, March 2011

### ARTICLES

Observability of Flow-Dependent Structure Functions for Use in Data Assimilation . . . . .	CRISTINA LUPU AND PIERRE GAUTHIER	713-725
Evaluation of the Impact of Observations on Analyses in 3D- and 4D-Var Based on Information Content . . . . .	CRISTINA LUPU, PIERRE GAUTHIER, AND STÉPHANE LAROCHE	726-737
Assimilating Along-Track Altimetric Observations through Local Hydrostatic Adjustment in a Global Ocean Variational Assimilation System . . . . .	ANDREA STORTO, SRDJAN DOBRICIC, SIMONA MASINA, AND PIERLUIGI DI PIETRO	738-754
Data Assimilation of Cloud-Affected Radiances in a Cloud-Resolving Model . . . . .	ROSANNE POLKINGHORNE AND TOMISLAVA VUKICEVIC	755-773
Some Experimental Lessons on Digital Filtering in the ALADIN-France 3DVAR Based on Near-Ground Examination . . . . .	CLAUDE FISCHER AND LUDOVIC AUGER	774-785
An Ensemble Ocean Data Assimilation System for Seasonal Prediction . . . . .	YONGHONG YIN, OSCAR ALVES, AND PETER R. OKE	786-808
Coastal Atmospheric Circulation around an Idealized Cape during Wind-Driven Upwelling Studied from a Coupled Ocean-Atmosphere Model. . . . .	NATALIE PERLIN, ERIC D. SKYLLINGSTAD, AND ROGER M. SAMELSON	809-829
Influence of Forced Large-Scale Atmospheric Patterns on Surface Air Temperature in China. . . . .	XIAOJING JIA AND HAI LIN	830-852
Observational Error Estimation of FORMOSAT-3/COSMIC GPS Radio Occultation Data . . . . .	SHU-YA CHEN, CHING-YUANG HUANG, YING-HWA KUO, AND SERGEY SOKOLOVSKIY	853-865
Toward an Uncertainty Budget for a Coastal Ocean Model. . . . .	SANGIL KIM, R. M. SAMELSON, AND CHRIS SNYDER	866-884
Factors Controlling Multiple Tropical Cyclone Events in the Western North Pacific . . . . .	JIANYUN GAO AND TIM LI	885-894
▶ An Observing System Experiment for Tropical Cyclone Targeting Techniques Using the Global Forecast System. . . . .	SIM D. ABERSON, SHARANYA J. MAJUMDAR, CAROLYN A. REYNOLDS, AND BRIAN J. ETHERTON	895-907
▶ ■ The Influence of Assimilating Dropsonde Data on Typhoon Track and Midlatitude Forecasts. . . . .	MARTIN WEISSMANN, FLORIAN HARNISCH, CHUN-CHIEH WU, PO-HSIUNG LIN, YOICHIRO OHTA, KOJI YAMASHITA, YEON-HEE KIM, EUN-HEE JEON, TETSUO NAKAZAWA, AND SIM ABERSON	908-920
Evaluation and Sensitivity Analysis of an Ocean Model Response to Hurricane Ivan. . . . .	G. R. HALLIWELL JR., L. K. SHAY, J. K. BREWSTER, AND W. J. TEAGUE	921-945
Can Fully Accounting for Clouds in Data Assimilation Improve Short-Term Forecasts by Global Models? . . . . .	ROBERT PINCUS, ROBERT J. PATRICK HOFMANN, JEFFREY L. ANDERSON, KEVIN RAEDER, NANCY COLLINS, AND JEFFREY S. WHITAKER	946-957
Dynamical, Statistical-Dynamical, and Multimodel Ensemble Forecasts of Australian Spring Season Rainfall . . . . .	EUN-PA LIM, HARRY H. HENDON, DAVID L. T. ANDERSON, ANDREW CHARLES, AND OSCAR ALVES	958-975
The AROME-France Convective-Scale Operational Model . . . . .	Y. SEITY, P. BROUSSEAU, S. MALARDEL, G. HELLO, P. BÉNARD, F. BOUTTIER, C. LAC, AND V. MASSON	976-991
The Spatial and Temporal Variability of Convective Storms over the Northeast United States during the Warm Season. . . . .	JOHN C. MURRAY AND BRIAN A. COLLE	992-1012
A New Bulk Microphysical Scheme That Includes Riming Intensity and Temperature-Dependent Ice Characteristics . . . . .	YANLUAN LIN AND BRIAN A. COLLE	1013-1035

## NOTES AND CORRESPONDENCE

- Parameterization of Riming Intensity and Its Impact on Ice Fall Speed Using ARM Data. . . . .  
 . . . . . YANLUAN LIN, LEO J. DONNER, AND BRIAN A. COLLE 1036-1047

► **Special Collection: Tropical Cyclone Predictability**

■ **Special Collection: Third Thorpex International Science Symposium**

PAPERS IN PRESS CAN BE VIEWED AS EARLY ONLINE RELEASES AT

### Publications of the American Meteorological Society

The JOURNAL OF THE ATMOSPHERIC SCIENCES publishes basic research related to the physics, dynamics, and chemistry of the atmosphere of the Earth and other planets, with emphasis on the quantitative and deductive aspects of the subject.

The JOURNAL OF APPLIED METEOROLOGY AND CLIMATOLOGY publishes applied meteorological research related to physical meteorology, weather modification, satellite meteorology, radar meteorology, boundary layer processes, air pollution meteorology (including dispersion and chemical processes), agricultural and forest meteorology, and applied meteorological numerical models. The journal also covers applied climatology research related to the use of climate information in decision making, impact assessments, seasonal climate forecast applications and verification, climate risk and vulnerability, development of climate monitoring tools, urban and local climates, and climate as it relates to the environment and society.

MONTHLY WEATHER REVIEW publishes research results relevant to the analysis and prediction of observed atmospheric circulations and physics, including technique development, data assimilation, model validation, and relevant case studies. This includes papers on numerical and data assimilation techniques that apply to the atmosphere and/or ocean environments as well as socioeconomic analyses of the impacts of weather and weather forecasts. *Monthly Weather Review* focuses on phenomena having seasonal and subseasonal time scales. Reviews of climatological aspects of high-impact events such as hurricanes, as well as review articles, are occasionally published.

The JOURNAL OF PHYSICAL OCEANOGRAPHY publishes research related to the physics of the ocean and to processes operating at its boundaries. Observational, theoretical, and modeling studies are all welcome, especially those that focus on elucidating specific physical processes. Papers that investigate interactions with other components of the earth system (e.g., ocean-atmosphere, physical-biological, and physical-chemical interactions) as well as studies of other fluid systems (e.g., lakes and laboratory tanks) are also invited, as long as their focus is on understanding the ocean or the ocean's role in the earth system.

The JOURNAL OF ATMOSPHERIC AND OCEANIC TECHNOLOGY publishes research describing instrumentation and methodologies used in atmospheric and oceanic research including remote sensing instruments, measurements, validation, and data analysis techniques from satellites, aircraft, balloons, and surface-based platforms; in situ instruments, measurements, and methods for data acquisition, analysis, and interpretation; and information systems and algorithms.

WEATHER AND FORECASTING publishes research that can lead without appreciable delay to improvements in operational forecasting, through implementation of new forecasting techniques relevant to case studies of significant weather events, modeling approaches, and dissemination of important information to operational forecasters. The journal covers research on deterministic and ensemble forecasting and analysis techniques applied to all time scales, forecast verification and new verification approaches, and methods to better forecast major weather events. This includes submissions that report on the capabilities of the latest physics, numerics, and data assimilation approaches within numerical models, ensembles, and statistical postprocessing techniques; demonstrate the transfer of research results to the forecasting community; and illustrate the societal use and values of forecasts.

The JOURNAL OF CLIMATE publishes climate research and, therefore, welcomes manuscripts concerned with large-scale variability of the atmosphere, oceans, and land surface, including the cryosphere; past present and projected future changes in the climate system (including those caused by human activities); climate simulation and prediction. Occasionally the *Journal of Climate* will publish review articles on particularly topical areas. Such reviews must be approved by the Chief Editor prior to submission.

The JOURNAL OF HYDROMETEOROLOGY publishes research related to the modeling, observing, and forecasting of processes related to water and energy fluxes and storage terms, including interactions with the boundary layer and lower atmosphere, and including processes related to precipitation, radiation, and other meteorological inputs.

The BULLETIN OF THE AMERICAN METEOROLOGICAL SOCIETY publishes papers on historical and scientific topics that are of general interest to the AMS membership. It also publishes papers in areas of current scientific controversy and debate, as well as review articles.

EARTH INTERACTIONS publishes in the electronic medium original research in the earth system sciences with emphasis on interdisciplinary studies. Within this framework, the journal particularly encourages submissions that deal with interactions among the lithosphere, hydrosphere, atmosphere, and biosphere in the context of global issues or global change.

WEATHER, CLIMATE, AND SOCIETY publishes research and analysis on the interactions of weather and climate with society and encompasses economic, policy, institutional, social, technological, environmental resources and health, and behavioral research, including mitigation and adaptation to weather and climate changes. Because of the interdisciplinary subject matter, articles that involve both natural/physical scientists and social scientists are particularly encouraged.

For information on becoming an AMS member and/or subscribing to the Society's journals, visit the AMS Web site: <http://www.ametsoc.org>.
