

# Monthly Weather Review

## Contents

Vol. 139, No. 8, August 2011

### ARTICLES

- Assimilation of Surface-Based Boundary Layer Profiler Observations during a Cool-Season Weather Event Using an Observing System Simulation Experiment. Part I: Analysis Impact ..... JASON A. OTKIN, DANIEL C. HARTUNG, DAVID D. TURNER, RALPH A. PETERSEN, WAYNE F. FELTZ, AND ERIK JANZON 2309–2326
- Assimilation of Surface-Based Boundary Layer Profiler Observations during a Cool-Season Weather Event Using an Observing System Simulation Experiment. Part II: Forecast Assessment ..... DANIEL C. HARTUNG, JASON A. OTKIN, RALPH A. PETERSEN, DAVID D. TURNER, AND WAYNE F. FELTZ 2327–2346
- A Land and Ocean Microwave Cloud Classification Algorithm Derived from AMSU-A and -B, Trained Using MSG-SEVIRI Infrared and Visible Observations ..... FILIPE AIRES, FRANCIS MARQUISSEAU, CATHERINE PRIGENT, AND GENEVIÈVE SÈZE 2347–2366
- A Subtropical Oceanic Mesoscale Convective Vortex Observed during SoWMEX/TIMREX ..... HSIAO-WEI LAI, CHRISTOPHER A. DAVIS, AND BEN JONG-DAO JOU 2367–2385
- Observations of the Cross-Lake Cloud and Snow Evolution in a Lake-Effect Snow Event ..... FAYE E. BARTHOLD AND DAVID A. R. KRISTOVICH 2386–2398
- Orogenic Convection in Subtropical South America as Seen by the TRMM Satellite ..... KRISTEN L. RASMUSSEN AND ROBERT A. HOUZE JR. 2399–2420
- Estimate of the Predictability of Boreal Summer and Winter Intraseasonal Oscillations from Observations ..... RUIQIANG DING, JIANPING LI, AND KYONG-HWAN SEO 2421–2438
- Mapping the Relationship between Northern Hemisphere Winter Surface Air Temperature and the Madden-Julian Oscillation ..... YANG ZHOU, KEITH R. THOMPSON, AND YOUYU LU 2439–2454
- Predictability of an Atmospheric Blocking Event that Occurred on 15 December 2005 ..... MIO MATSUEDA, MASAYUKI KYOUDA, ZOLTAN TOTI, H. L. TANAKA, AND TADASHI TSUYUKI 2455–2470
- Objective Debiasing for Improved Forecasting of Tropical Cyclone Intensity with a Global Circulation Model ..... P. GOSWAMI, S. MALLICK, AND K. C. GOUDA 2471–2487
- Hurricane Gustav (2008) Waves and Storm Surge: Hindcast, Synoptic Analysis, and Validation in Southern Louisiana ..... J. C. DIETRICH, J. J. WESTERINK, A. B. KENNEDY, J. M. SMITH, R. E. JENSEN, M. ZIJLEMA, L. H. HOLTHUIJSEN, C. DAWSON, R. A. LUETTICH JR., M. D. POWELL, V. J. CARDONE, A. T. COX, G. W. STONE, H. POURTAHERI, M. E. HOPE, S. TANAKA, L. G. WESTERINK, H. J. WESTERINK, AND Z. COBELL 2488–2522
- On the Characteristic Height Scales of the Hurricane Boundary Layer ..... JUN A. ZHANG, ROBERT F. ROGERS, DAVID S. NOLAN, AND FRANK D. MARKS JR. 2523–2535
- A Framework for the Statistical Analysis of Large Radar and Lightning Datasets: Results from STEPS 2000 ..... TIMOTHY J. LANG AND STEVEN A. RUTLEDGE 2536–2551
- Global Angular Momentum Fluxes in Height Coordinates ..... JOSEPH EGGER AND KLAUS-PETER HOINKA 2552–2560
- Spatiotemporal Behavior of the TIGGE Medium-Range Ensemble Forecasts ..... ZAK KIPLING, CRISTINA PRIMO, AND ANDREW CHARLTON-PEREZ 2561–2571
- Sensitivity of Dynamical Intraseasonal Prediction Skills to Different Initial Conditions ..... XIUHUANG FU, BIN WANG, JUNE-YI LEE, WANQIU WANG, AND LI GAO 2572–2592
- The VDAC Technique: A Variational Method for Detecting and Characterizing Convective Vortices in Multiple-Doppler Radar Data ..... COREY K. POTVIN, ALAN SHAPIRO, MICHAEL I. BIGGERSTAFF, AND JOSHUA M. WURMAN 2593–2613

A Scale-Invariant Formulation of the Anticipated Potential Vorticity Method .....	QINGSHAN CHEN, MAX GUNZBURGER, AND TODD RINGLER	2614-2629
Locally Calibrated Probabilistic Temperature Forecasting Using Geostatistical Model Averaging and Local Bayesian Model Averaging .....	WILLIAM KLEIBER, ADRIAN E. RAFTERY, JEFFREY BAARS, TILMANN GNEITING, CLIFFORD F. MASS, AND ERIC GRIMIT	2630-2649
Controlling Overestimation of Error Covariance in Ensemble Kalman Filters with Sparse Observations: A Variance-Limiting Kalman Filter .....	GEORG A. GOTTWALD, LEWIS MITCHELL, AND SEBASTIAN REICH	2650-2667
Evolutionary Algorithm-Based Error Parameterization Methods for Data Assimilation .....	YULONG BAI AND XIN LI	2668-2685
CORRIGENDUM .....	MICHAEL C. CONIGLIO, JASON Y. HWANG, AND DAVID J. STENSRUD	2686-2688

► **Special Collection:** *The Third International THORPEX Science Symposium*

PAPERS IN PRESS CAN BE VIEWED AS EARLY ONLINE RELEASES AT  
<http://ams.allenpress.com/EOR>

### Publications of the American Meteorological Society

The *JOURNAL OF THE ATMOSPHERIC SCIENCES* publishes basic research related to the physics, dynamics, and chemistry of the atmosphere of the Earth and other planets, with emphasis on the quantitative and deductive aspects of the subject.

The *JOURNAL OF APPLIED METEOROLOGY AND CLIMATOLOGY* publishes applied meteorological research related to physical meteorology, weather modification, satellite meteorology, radar meteorology, boundary layer processes, air pollution meteorology (including dispersion and chemical processes), agricultural and forest meteorology, and applied meteorological numerical models. The journal also covers applied climatology research related to the use of climate information in decision making, impact assessments, seasonal climate forecast applications and verification, climate risk and vulnerability, development of climate monitoring tools, urban and local climates, and climate as it relates to the environment and society.

*MONTHLY WEATHER REVIEW* publishes research results relevant to the analysis and prediction of observed atmospheric circulations and physics, including technique development, data assimilation, model validation, and relevant case studies. This includes papers on numerical and data assimilation techniques that apply to the atmosphere and/or ocean environments as well as socioeconomic analyses of the impacts of weather and weather forecasts. *Monthly Weather Review* focuses on phenomena having seasonal and subseasonal time scales. Reviews of climatological aspects of high-impact events such as hurricanes, as well as review articles, are occasionally published.

The *JOURNAL OF PHYSICAL OCEANOGRAPHY* publishes research related to the physics of the ocean and to processes operating at its boundaries. Observational, theoretical, and modeling studies are all welcome, especially those that focus on elucidating specific physical processes. Papers that investigate interactions with other components of the earth system (e.g., ocean-atmosphere, physical-biological, and physical-chemical interactions) as well as studies of other fluid systems (e.g., lakes and laboratory tanks) are also invited, as long as their focus is on understanding the ocean or the ocean's role in the earth system.

The *JOURNAL OF ATMOSPHERIC AND OCEANIC TECHNOLOGY* publishes research describing instrumentation and methodologies used in atmospheric and oceanic research including remote sensing instruments, measurements, validation, and data analysis techniques from satellites, aircraft, balloons, and surface-based platforms; in situ instruments, measurements, and methods for data acquisition, analysis, and interpretation; and information systems and algorithms.

*WEATHER AND FORECASTING* publishes research that can lead without appreciable delay to improvements in operational forecasting, through implementation of new forecasting techniques relevant to case studies of significant weather events, modeling approaches, and dissemination of important information to operational forecasters. The journal covers research on deterministic and ensemble forecasting and analysis techniques applied to all time scales, forecast verification and new verification approaches, and methods to better forecast major weather events. This includes submissions that report on the capabilities of the latest physics, numerics, and data assimilation approaches within numerical models, ensembles, and statistical postprocessing techniques; demonstrate the transfer of research results to the forecasting community; and illustrate the societal use and values of forecasts.

The *JOURNAL OF CLIMATE* publishes climate research and, therefore, welcomes manuscripts concerned with large-scale variability of the atmosphere, oceans, and land surface, including the cryosphere; past present and projected future changes in the climate system (including those caused by human activities); climate simulation and prediction. Occasionally the *Journal of Climate* will publish review articles on particularly topical areas. Such reviews must be approved by the Chief Editor prior to submission.

The *JOURNAL OF HYDROMETEOROLOGY* publishes research related to the modeling, observing, and forecasting of processes related to water and energy fluxes and storage terms, including interactions with the boundary layer and lower atmosphere, and including processes related to precipitation, radiation, and other meteorological inputs.

The *BULLETIN OF THE AMERICAN METEOROLOGICAL SOCIETY* publishes papers on historical and scientific topics that are of general interest to the AMS membership. It also publishes papers in areas of current scientific controversy and debate, as well as review articles.

*EARTH INTERACTIONS* publishes in the electronic medium original research in the earth system sciences with emphasis on interdisciplinary studies. Within this framework, the journal particularly encourages submissions that deal with interactions among the lithosphere, hydrosphere, atmosphere, and biosphere in the context of global issues or global change.

*WEATHER, CLIMATE, AND SOCIETY* publishes research and analysis on the interactions of weather and climate with society and encompasses economic, policy, institutional, social, technological, environmental resources and health, and behavioral research, including mitigation and adaptation to weather and climate changes. Because of the interdisciplinary subject matter, articles that involve both natural/physical scientists and social scientists are particularly encouraged.

For information on becoming an AMS member and/or subscribing to the Society's journals, visit the AMS Web site: <http://www.ametsoc.org>.
