

Journal of Applied Meteorology and Climatology

Contents

Vol. 50, No. 3, March 2011

ARTICLES

- Classification of Weather Patterns and Associated Trajectories of High-Ozone Episodes in the Houston-Galveston-Brazoria Area during the 2005/06 TexAQS-II FONG NGAN AND DAEWON BYUN 485-499
- Temporal and Spatial Variations of NO_x and Ozone Concentrations in Seoul during the Solar Eclipse of 22 July 2009 KYUNG-HWAN KWAK, YOUNG-HEE RYU, AND JONG-JIN BAIK 500-506
- Green Roof Mitigation Potential for a Proxy Future Climate Scenario in Chicago, Illinois KATHRYN R. SMITH AND PAUL J. ROEBBER 507-522
- Influence of Indian Summer Monsoon on Aerosol Loading in East Asia XIAODONG LIU, LIBIN YAN, PING YANG, ZHI-YONG YIN, AND GERALD R. NORTH 523-533
- Dust Devil-Like Vortices in an Urban Area Detected by a 3D Scanning Doppler Lidar CHUSEI FUJIWARA, KAZUYA YAMASHITA, MIKIO NAKANISHI, AND YASUSHI FUJIYOSHI 534-547
- Estimating Drought Conditions for Regions with Limited Precipitation Data JINYOUNG RHEE AND GREGORY J. CARBONE 548-559
- Future Occurrence of Threshold-Crossing Seasonal Rainfall Totals: Methodology and Application to Sites in Africa ASHER B. SIEBERT AND M. NEIL WARD 560-578
- High-Temporal-Resolution Capabilities of the National Weather Radar Testbed Phased-Array Radar PAMELA L. HEINSELMAN AND SEBASTIÁN M. TORRES 579-593
- A Synthetic Aperture Radar-Based Climatology of Open-Cell Convection over the Northeast Pacific Ocean TODD D. SIKORA, GEORGE S. YOUNG, CAREN M. FISHER, AND MATTHEW D. STEPP 594-603
- The Cumulative Impact of Cloud Droplet Nucleating Aerosols on Orographic Snowfall in Colorado STEPHEN M. SALEEBY, WILLIAM R. COTTON, AND JAMIE D. FULLER 604-625
- Clouds at Arctic Atmospheric Observatories. Part I: Occurrence and Macrophysical Properties MATTHEW D. SHUPE, VON P. WALDEN, EDWIN ELORANTA, TANEIL UTTAL, JAMES R. CAMPBELL, SANDRA M. STARKWEATHER, AND MASATAKA SHIOBARA 626-644
- Clouds at Arctic Atmospheric Observatories. Part II: Thermodynamic Phase Characteristics MATTHEW D. SHUPE 645-661
- An Analysis of Near-Surface Winds, Air Temperature, and Cyclone Activity in Terra Nova Bay, Antarctica, from 1993 to 2009 SHELLEY L. KNUTH AND JOHN J. CASSANO 662-680
- The Measurement Factors in Estimating Snowfall Derived from Snow Cover Surfaces Using Acoustic Snow Depth Sensors ALEXANDRE P. FISCHER 681-699
- Quality Control and Tilt Correction Effects on the Turbulent Fluxes Observed at an Ocean Platform HYUN-MI OH, KYUNG-EAK KIM, KYUNG-JA HA, LARRY MAHRT, AND JAE-SEOL SHIM 700-712
- Diagnostic Study of the Effects of a Large City on Heavy Rainfall as Revealed by an Ensemble Simulation: A Case Study of Central Tokyo, Japan TOMOHIKO INAMURA, TAKEKI IZUMI, AND HIROSHI MATSUYAMA 713-728
- Diurnal Cycle of Thermally Driven Cross-Basin Winds in Arizona's Meteor Crater MANUELA LEHNER, C. DAVID WHITEMAN, AND SEBASTIAN W. HOCH 729-744
- Statistical Reliability of Neighboring Range Bin Estimates of Coherent Fractional Contributions to Radar Backscattered Power A. R. JAMESON 745-749
- Estimation of the Upper-Layer Rotation and Maximum Wind Speed of Tropical Cyclones via Satellite Imagery CHUN-CHIEH CHAO, GIN-RONG LIU, AND CHUNG-CHIH LIU 750-766
- NOTES AND CORRESPONDENCE
- Evaluation of the Relationship between Air and Land Surface Temperature under Clear- and Cloudy-Sky Conditions KEVIN GALLO, ROBERT HALE, DAN TARPLEY, AND YUNYUE YU 767-775
- Warning Information in a Preconvection Environment from the Geostationary Advanced Infrared Sounding System—A Simulation Study Using the IHOP Case JUN LI, JINLONG LI, JASON OTKIN, TIMOTHY J. SCHMIT, AND CHIAN-YI LIU 776-783
