

In situ electrical parameter identification method for induction wind generators I. Zubia, A. Zatarain, C. Alcalde and X. Ostolaza	549
Hysteresis torque estimation by using iron-loss analysis in permanent magnet synchronous motor B.-K. Song, T. Sun, J.-P. Hong and J.-J. Lee	558
Hybrid recurrent cerebellar model articulation controller-based supervisory H^∞ motion control system for permanent-magnet synchronous motor servo drive F.F.M. El-Sousy	563
Model of laminated ferromagnetic cores for loss prediction in electrical machines P. Rasilo, E. Dlala, K. Fonteyn, J. Pippuri, A. Belahcen and A. Arkkio	580
Spread spectrum modulation scheme for two-level inverter using vector quantised space vector-based pulse density modulation B. Jacob and M.R. Baiju	589
Analytical prediction of electromagnetic performance of surface-mounted PM machines based on subdomain model accounting for tooth-tips L.J. Wu, Z.Q. Zhu, D. Staton, M. Popescu and D. Hawkins	597
