December 2012, Vol 46, No 526

## Features

### 18 Security

Exploring why the ISPS Code remains maligned and misunderstood by seafarers

### 26 Tanker safety

SAS investigates new attempts to prevent deadly explosions on small tankers

### 32 Medical and health

Why are so many onboard medical chests out of date, uncertified or badly stocked?

## Regulars

### 4 Our say

SAS's managing editor says that regulating health on board is everyone's responsibility

### 5 Your say

A SAS reader explains why MLC 2006 must be taken seriously by the industry

### 6 News

*Concordia* legal battles; *Shinline 8* rescue deaths; 2013 SAS Awards announced

### 14 Security news

Italian owners want armed guard action; IMB confirms piracy fall; *Orna* latest

### 16 Training news

SCI sees hook training demand; UK cadet numbers rise; Eos firefighting facility

### 39 Using SAS on board

For Knutsen OAS Shipping, a subscription to SAS is a key piece of the safety puzzle

### 40 Regulation insight

Changes to Marpol Annex VI go under the microscope this month

### 41 Products

How CrewCash and ShipMoney can help mariners manage their finances

### 42 Safety briefing

A tanker blaze and an engine room explosion for your crew to analyse

### 44 MARS

Malaria and dengue dangers in focus

### 50 View astern

Charitable dips in the Tyne and Loch Striven

## on the cover

The problem of badly stocked and uncertified medical chests is our focus this month. "I hear of at least one case a month of seafarer death or injury caused because the medical chest hasn't been used or the right drugs were not inside," one interviewee says in our feature beginning on page 32
