

CONTENTS

Fault diagnosis for distribution substations using fuzzy sagittal mapping analysis <i>Wen-Hui Chen and Chi-Shan Yu</i>	129
Design of embedded capacitor with enhanced high-frequency performance <i>Bin-Chyi Tseng and Li-Chun Liao</i>	141
Enhancement of a single-input fuzzy logic control system using a novel method <i>Shih-Chih Lee and Ching-Long Shih</i>	151
A state diagram analysis of the multi-queue $M/M/1$ model with finite lengths <i>Mu-Song Chen and Hao-Wei Yen</i>	165
Structural design and optimization using neural networks and genetic algorithms of a tanker vehicle <i>Ramon Miralbes and Luis Castejon</i>	181
Mode III fracture problem of an FGPM strip bonded to an FGPM half-plane with embedded arbitrarily oriented cracks <i>Chien-Nan Yeh and Ching-Hwei Chue</i>	193
Small-scale projection lap-joint welding of KOVAR alloy and SPCC steel <i>Yung-Chang Chen, Kuang-Hung Tseng and Hsiang-Cheng Wang</i>	211
Characteristics of the wind pressure distribution on a saddle roof <i>Dong Xin and Ye Jihong</i>	219
Characteristics of public-private partnerships for municipal wastewater treatment in Taiwan <i>Chien-Hsien Lee and Yue-Hwa Yu</i>	245
On parallelization of circuit simulation SPICE3 using multithreaded programming techniques <i>Tien-Hsiung Weng, Ruey-Kuen Perng and Kuan-Ching Li</i>	259
