

CONTENTS

Construction project partnering using fuzzy based decision making methodology <i>Tung-Tsan Chen and Tsung-Chiang Wu</i>	269
Reliability assessment for traffic data <i>Dung-Ying Lin, Stephen Boyles, Varunraj Valsaraj and S. Travis Waller</i>	285
Optimal variable speed-limit control under abnormal traffic conditions <i>Yu-Chiun Chiou, Yen-Fei Huang and Po-Cheng Lin</i>	299
Development of multi-spiral confinements in rectangular columns for construction automation <i>Samuel Yen-Liang Yin, Jui-Chen Wang and Ping-Hsiung Wang</i>	309
Estimated system reliability of a cloud computing network subject to maintenance budget <i>Yi-Kuei Lin and Ping-Chen Chang</i>	321
Development of an ultraspectral imaging system by using a concave monochromator <i>Chung-Cheng Kung, Ming-Han Lee and Ching-Lu Hsieh</i>	329
Design of head-mounted-display eyepiece system of liquid crystal on silicon <i>Chien-Yue Chen, Ming-Da Ke, Qing-Long Deng, Yang-Hua Chang, Ping-Lin Fan and Shun-Wen Cheng</i>	343
A comprehensive study of path-level performance evaluation and traffic aggregation for discrete-time tandem network <i>Cheng-Ching Peng and Huei-Wen Ferng</i>	349
A new optimal MUD algorithm based on searching in the local space of sub-optimal MMSE solutions for DS-UWB communication systems <i>Zhendong Yin, Zhiyuan Zong, Yunsheng Kuang and Zhilu Wu</i>	363
Torque value evaluated by ultrasonic technique during polymer melting process <i>Chin-Chi Cheng and Wen-Jye Liou</i>	373
