## VACUUMARATOR™. THE ORIGINAL – INVENTED AND IMPROVED BY JETS™.

The new 95MB Vacuumarator™ pump makes Jets™ vacuum sanitary systems even better – at no extra cost

The Vacuumarator™ pump is the driving force in any Jets™ vacuum sanitary system. The new 95MB has 30% more capacity compared with the legendary 65MBA. Increased capacity means less energy demand, running time and wear. The result is even better reliability. And furthermore: It costs the same.

**Upgrade from 65MBA in half an hour**  
 Same footprint, measures and connections, makes retrofit and upgrade extremely simple. The spare parts you have in stock, can be used on the 95MB.

INVESTING IN THE ORIGINAL PAYS OFF
