

## Articles

[A Numerical Study of a Stratocumulus-Topped Boundary-Layer: Relations of Decaying Clouds with a Stability Parameter across Inversion](#)

p.727-746

Akira T. NODA, Kozo NAKAMURA, Toshiki IWASAKI, Masaki SATOH  
Released: January 10, 2014

 Abstract

Full Text PDF[5803K]

[A New Method for Identifying the Main Type of Solid Hydrometeors Contributing to Snowfall from Measured Size-Fall Speed Relationship](#)

p.747-762

Masaaki ISHIZAKA, Hiroki MOTOYOSHI, Sento NAKAI, Toru SHIINA,  
Toshiro KUMAKURA, Ken-ichiro MURAMOTO  
Released: January 10, 2014

 Abstract

Full Text PDF[2779K]

[Classification and Quantification of Snow Based on Spatial Variability of Radar Reflectivity](#)

p.763-774

Sanghun LIM, Dmitri MOISSEEV, Venkatachalam CHANDRASEKAR,  
Dong-Ryul LEE  
Released: January 10, 2014

 Abstract

Full Text PDF[2327K]

[Analytical Solutions of Vortex Rossby Waves in a Discrete Barotropic Model](#)

p.775-788

Takahiro ITO, Hirotada KANEHISA  
Released: January 10, 2014

 Abstract

Full Text PDF[1980K]

[Aerosol Characterization by Dual-Wavelength Polarization Lidar Measurements over Kochi, Japan during the Warm Seasons of 2008 to 2010](#)

p.789-800

Tetsu SAKAI, Tomohiro NAGAI, Narihiro ORIKASA, Yuji ZAIZEN, Katsuya  
YAMASHITA, Yuzo MANO, Masataka MURAKAMI  
Released: January 10, 2014

 Abstract

Full Text PDF[1114K]

[Rain Microphysical Budget in the Tropical Deep Convective Regime: A 2-D Cloud-Resolving Modeling Study](#)

p.801-815

Xiaofan LI, Xinyong SHEN  
Released: January 10, 2014

 Abstract

Full Text PDF[876K]

[Aerosol Effects on Cumulus Congestus Population over the Tropical Pacific: A Cloud-Resolving Modeling Study](#)

p.817-833

Xiaowen LI, Wei-Kuo TAO, Hirohiko MASUNAGA, Guojun GU, Xiping ZENG

Released: January 10, 2014

 Abstract Full Text PDF[2091K]

## Notes And Correspondence

[ENSO Regime Change since the Late 1970s as Manifested by Two Types of ENSO](#)

p.835-842

Hong-Li REN, Fei-Fei JIN, Malte F. STUECKER, Ruihuang XIE

Released: January 10, 2014

 Abstract Full Text PDF[893K]

[A Proof for the Equivalence of Two Upper Bounds for the Growth of Disturbances from Barotropic Instability](#)

p.843-850

Keiichi ISHIOKA

Released: January 10, 2014

 Abstract Full Text PDF[409K]

1 - 9 / 9 Articles.
