January 2012, Vol 47, No 527

## Features

**18 Equipment servicing**  
From worn wires to corroded davits, poor servicing can be a life-threatening problem

**22 Navigation and bridge**  
Fatigue-management software could transform the industry's accident record

**28 Communications**  
How can crews communicate more effectively with pilots and one another?

## Regulars

**4 Our say**  
SAS's managing editor on navigational competence and accountability

**5 Your say**  
A master meditates on a decade of living with the ISPS Code

**6 News**  
Plight of *Maas Trader* master; five dead on *Maharsi Krishnatreya*; SAS editorial board created; China MSA plans investigation lab; BP's \$4Bn fine; *Amurskaya* latest

**14 Security news**  
Piracy focus on the Gulf of Guinea; Vietnam arrests pirate suspects; one dead in dhow shoot-out; *Arowana United* recovered

**16 Training news**  
ECDIS recommendations published; WMA and WrightWay take the HELM; evidence-collection course launched

**32 Regulation insight**  
Solid bulk cargoes under the spotlight

**33 Products**  
A compact MOB and a bolt-on ECDIS

**34 Safety briefing**  
A near-miss, a grounding and a collision for your crew to cogitate on

**36 MARS**  
A detached fairlead roller and a pneumatic needle gun lead to injuries in these reports

**42 View astern**  
Introducing the latest innovation in search and rescue operations: passenger jets

## on the cover

Seafarer fatigue-management tools could help transform the industry's poor record on collisions and groundings, but does the software work and will anyone use it? In our feature on page 22 we examine how existing programs can help to manage tiredness and gauge industry reaction to them
