May 2013, Vol 47, No 531

## Features

### 18 Bulker safety

Forward compartments continue to be vulnerable because of design risks

### 24 Navigation and bridge

Does a certificate still prove that a seafarer is competent to navigate a ship safely?

### 32 Enclosed spaces

Addressing the dangers of toxic cargo holds and oxygen-deficient atmosphere

## Regulars

### 4 Our say

SAS's managing editor examines growing concerns over navigational competence

### 5 Your say

A seafarer makes a plea for training while another sounds off on fitness

### 6 News

Carnival invests in redundancy; Safety at Sea Awards ready for bookings; collisions prompt Singapore warning; *Rabaul Queen* survivors sue; GPS back-up a success

### 14 Security news

USCG cites cyber threat; pirates release *Royal Grace* and *Smyrni*; ships hijacked 'to order' in Asia; *Mavi Marmara* apology

### 16 Training news

Filipino school closure warning; American Club releases another Silent Assassin; MOL begins ambitious training programme

### 36 Regulation insight

Big changes on the way for guidance on fire protection systems and appliances

### 37 Products

West Africa vessel protection and tanker vetting software profiled

### 38 Safety briefing

A tug capsizes during tow and a crew member is lost overboard in these reports

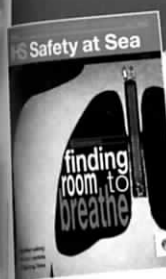

### 40 MARS

Buoy fouled after loss of propulsion

### 46 View astern

Mapping Mulberry with the UKHO

## on the cover

The number of seafarers who die in enclosed spaces each year could grow if crews lack access to the right safety training or equipment. SAS speaks to the experts about training and regulation, and analyses attempts to address the dangers of oxygen-deficient areas **on page 32**
