July 2013, Vol 47, No 533

Features

18 Training and crewing
How the age-old technique of maritime mentoring can survive in the modern world

24 Personal protective equipment
Attitudes to PPE have improved, but can regulations ensure you have the right gear?

28 Tanker safety
Slushing is a largely theoretical risk, yet builders and class societies take it seriously

on the cover

Safety at Sea

Personal protective equipment (PPE) can be a matter of life and death. *Safety at Sea* looks at seafarer and manufacturer attitudes to PPE and explores the diffuse regulatory regime governing this key gear, before examining some examples of incorrect PPE use, in our feature beginning **on page 24**

A circular graphic with icons representing various safety equipment and a central figure.

Regulars

4 Our say
After Nor-Shipping, SAS's managing editor ponders what email mistakes and offshore shipping safety have in common

5 Your say
One reader wants pirates to walk the plank, while another wants seafarers to be valued

6 News
Jolly Nero incident; *Concordia* trial; Philippine audit warning; Panamanian certification scandal; *Grandeur of the Seas* fire; towing safety in the US

14 Security news
Hansa Marburg released; US refutes regional piracy connection; TWIC under fire again; Somali piracy 'still a threat'

16 Training news
African cadets look for berths; Warsash adds boxship; GoAGT's DNV accreditation

33 Regulation insight
How to achieve compliance with the Maritime Labour Convention 2006

34 Safety briefing
Parting line injuries, a pilot-assisted grounding and a fatal footbridge fall

36 MARS
A close call in a confined space

38 Products
Repelling boarders and ship bacteria

42 View astern
A giant rubber duck in Hong Kong and pirates at the Women's Institute
