September 2013, Vol 47, No 535

Features

16 Bulker safety

An investigation into the *Swanland* sinking prompts questions about cargo ship safety

22 Navigation and bridge

As bridges become more sophisticated, researchers try to keep humans in the loop

26 Tanker safety

Authorities seem to be stalling on requiring new systems for oil and chemical tankers

Safety at Sea

on the cover

Faith in computers has led to increasingly sophisticated bridges, but the realisation that the human must be kept in the loop has caused a shift in thinking; researchers across Europe are looking at how to improve safety on the bridge of the future. Read the full story in our feature **on page 22**

Regulars

4 Our say

SAS's managing editor meditates on two very different accident investigation reports

5 Your say

A seafarer meditates on 'the three Ws in sailors' lives' and the reality of work at sea

6 News
