

CONTENTS

Emulation environment for automobile automatic climate control <i>Sheng-Luen Chung and Chung-Lun Li</i>	551
Effective manipulation for a multi-DOF robot manipulator in laboratory environments <i>Mu-Cheng Hsieh and Kuu-Young Young</i>	566
Developing a turbine cycle model using adaptive neuro-fuzzy inference system for Kuosheng nuclear power plant <i>Yea-Kuang Chan and Jyh-Cherng Gu</i>	577
Robust sliding control for mismatched uncertain fuzzy time-delay systems using linear matrix inequality approach <i>Sung-Chieh Liu and Sheng-Fuu Lin</i>	589
Simulation and analysis of metal-oxide surge block arrester dynamic characteristics <i>Sheng-Jen Hsiao</i>	598
Evolution of local to global minimum torque ripples of direct torque control for induction motor drives <i>Kuo-Kai Shyu, Juu-Kuh Lin, Van-Truong Pham, Thi-Thao Tran and Li-Jen Shang</i>	608
Cross-layer design for block subchannel allocation and admission control in the IEEE 802.16 OFDMA networks <i>Yaw-Wen Kuo and Chih-Yao Liao</i>	616
On prediction of stiffness variation of slender members using impact responses <i>Chih-Peng Yu, Jiunnren Lai, Chia-Chi Cheng and Chi-Hung Chiang</i>	627
Pose estimation for autonomous grasping with a robotic arm system <i>Chia-Hung Chen and Han-Pang Huang</i>	638
Heat transfer modeling of conjugated Graetz problems in double-pass parallel-plate heat exchangers under asymmetric wall temperatures <i>Chii-Dong Ho, Yi-Chin Chen, Hsuan Chang and Shung-Wen Kang</i>	647
Parallel RSA encryption based on tree architecture <i>Masumeh Damrudi and Norafida Ithnin</i>	658
Estimation 2-D angle of arrival with a cross-correlation matrix <i>Lu Gan, Wen-Feng Lin, Xiao-Yu Luo and Ping Wei</i>	667
Robust controllability of linear time-invariant interval systems <i>Shinn-Horng Chen and Jyh-Horng Chou</i>	672
