

CONTENTS

Ultra-pure air for AMC control in nano-processing environment <i>Tzu-Sou Chuang and Luh-Maan Chang</i>	965
Behavior of oblong and rectangular bridge columns with conventional tie and multi-spiral transverse reinforcement under combined axial and flexural loads <i>Tzu-Liang Wu, Yu-Chen Ou, Samuel Yen-Liang Yin, Jui-Chen Wang, Ping-Hsiung Wang and Si-Huy Ngo</i>	980
A study on damage assessment of the scoured bridges <i>Yu-Chi Sung and Chun-Ying Wang</i>	994
Evaluation of styrene-butadiene latex as a vibration damping admixture for concrete: a micromechanical analysis <i>Jun Chen, Tong-Yan Pan and Xiao-Ming Huang</i>	1008
Numerical modeling of displacements due to ocean tide loading: case study at GPS stations in Taiwan and western Pacific <i>Cheinway Hwang and Jiu-Fu Huang</i>	1017
Life-cycle cost analysis in determining an importance factor for fire department buildings <i>Wei-Cheng Chen, I-Chau Tsai and Kuang-Wu Chou</i>	1029
Calculation of stress intensity factors for curved cracks in anisotropic FGMs <i>Jui-Hung Chang and Dah-Suen Tang</i>	1045
Segmentation of the hip joint in CT volumes using adaptive thresholding classification and normal direction correction <i>Shengjun Zhou, Yuanzhi Cheng, Yadong Wang, Kaikun Dong, Changyong Guo, Jing Bai and Shinichi Tamura</i>	1059
Complete PV model considering its thermal dynamics <i>Huan-Liang Tsai</i>	1073
Variation of air flow pattern through dissimilar valve lift in a spark ignition engine <i>Devarajan Ramasamy, Khoo Aik Soon, Horizon Walker-Gitano Briggs and Z.A Zainal</i>	1083
