

CONTENTS

Papers

The Executive Model and Efficiency Analysis of Power Intrachange	Tai-Ken Lu and Wen-Chi Chang	111
Numerical Simulations and Wind Tunnel Studies of Pollutant Dispersion in the Urban Street Canyons with Different Height Arrangements	Cheng-Hsin Chang, Jin-Shian Lin, Chii-Ming Cheng, and Yung-Shan Hong	119
Further Results on Robust Exponential Stabilization for Time-Varying Delay Saturating Actuator Systems with Delay-Dependence	Pin-Lin Liu	127
A Model of Return Flow Recovery System in Paddy Field Base on GIS	Yu-Chuan Chang, Shih-Yi Fan, Jen-Yan Chen, and Chun-E. Kan	136
An Analytical Solution for Linear Long Wave Reflection by Two Submerged Rectangular Breakwaters	Huan-Wen Liu and Jiong-Xing Luo	142
Vibration Suppression of Train-Induced Multiple Resonant Responses of Two-Span Continuous Bridges Using VE Dampers	Ying-Jie Wang, Jong-Dar Yau, and Qing-Chao Wei	149
Passive Fuzzy Controller Design for Discrete Ship Steering Systems via Takagi-Sugeno Fuzzy Model with Multiplicative Noises	Wen-Jer Chang, Min-Wei Chen, and Cheung-Chieh Ku	159
Shape Evolution of a Long Bubble Penetrating Liquids with Various Viscosities	Cheng-Hsing Hsu, Ching-Chuan Chang, Chia-Chuan Kuo, and Kuang-Yuan Kung	166
Effects of Surface Roughness and Flow Rheology on the EHL of Circular Contacts with Power-Law Fluid	Li-Ming Chu, Jaw-Ren Lin, Hsiang-Chen Hsu, and Yuh-Ping Chang	175
Investigating Critical Factors That Influence Shippers' and International Freight Forwarders' Preferences in Carrier Selection Using Integrated Hierarchical Information Integration Approach	Jin-Long Lu	182
A Numerical Study of Cubic Parabolas on Railway Transition Curves	Tsung-I Shen, Che-Hao Chang, Kuan-Yung Chang, and Cho-Chien Lu	191
An Improvement of Wave Refraction-Diffraction Effect in SWAN	Jaw-Guei Lin	198
On the Influence of the Mode-Shapes of a Marine Propulsion Shafting System on the Prediction of Torsional Stresses	Bin Tang and Michael J. Brennan	209
An Exact and Meta-Heuristic Approach for Two-Agent Single-Machine Scheduling Problem	Wen-Hung Wu	215
An Experimental Study of Regular Long Crested Waves Over a Crescent Type Shoal	Wen-Kai Weng, Jaw-Guei Lin, and Chun-Sien Hsiao	222
