

CONTENTS

Analyses of braced excavation considering parameter uncertainties using a finite element code <i>Huu-Phuoc Dang, Horn-Da Lin and C. Hsein Juang</i>	141
CO ₂ capture at high temperature using calcium-based sorbents <i>Min-Jung Hsu, Kai-Hsuan Lee and Yau-Pin Chyow</i>	152
Determining the optimal mixture for recycled aggregate concrete with multiple responses <i>Chin-Yun Chang, Ran Huang, Pin-Chan Lee and Tsai-Lung Weng</i>	165
Uplift behavior of shaft anchors in silty sand in Taipei Basin <i>Shih-Tsung Hsu and Wen-Chi Hu</i>	175
Lessons learnt from customization of a BIM tool for a design-build company <i>Meng-Han Tsai, Shih-Chung Kang and Shang-Hsien Hsieh</i>	189
The effects of spark-out on flatness in steel grinding <i>Jin Jen Wang and Hon So</i>	200
Development of a binocular vision-based catcher robot system using DSP platform <i>Chyi-Yeu Lin, Yi-Pin Chiu, Chi-Ying Lin and Chau-Ren Tsai</i>	210
An evolutionary algorithm for optimizing the machine repair problem under a threshold recovery policy <i>Dong-Yuh Yang and Ya-Chu Chiang</i>	224
Implementation of imperialist competitive algorithm to solve non-convex economic dispatch problem <i>Ehsan Bijami, Morteza Jadidoleslam, Akbar Ebrahimi, Javad Askari and Malihe Maghfoori Farsangi</i>	232
Source/relays/destination combined MMSE-based optimization for AF-MIMO multiple-relay systems with correlated channel uncertainties <i>Chia-Chang Hu and Yi-Shiang Chiu</i>	243
Oscillation reduction for overhead cranes with time-varying payload and rope length <i>Yung-Feng Chen and An-Chyau Huang</i>	259
An exploration of deriving fuel from end-of-life vehicle automotive shredder residue <i>Hua-Shan Tai and Wei-Hsiung He</i>	268
