

CONTENTS

Experimental study for seismic demands on in-cabinet equipment in NPPs <i>Fan-Ru Lin, Juin-Fu Chai, Zih-Yu Lai, Pai-Fang Chou and Yuan-Chieh Wu</i>	833
Developing critical success factors for the assessment of BIM technology adoption: part I. Methodology and survey <i>Meng-Han Tsai, Momy Mom and Shang-Hsien Hsieh</i>	845
Developing critical success factors for the assessment of BIM technology adoption: Part II. Analysis and results <i>Momy Mom, Meng-Han Tsai and Shang-Hsien Hsieh</i>	859
Coordinate transformation of cadastral maps using different adjustment methods <i>Yasemin Sisman</i>	869
An EMD-based procedure to evaluate the experimental dispersion curve of the SASW method <i>Sheng-Huoo Ni, Yu-Zhang Yang and Yan-Hong Huang</i>	883
Determining the steady-state chloride migration coefficient of ITZ in mortar by using the accelerated chloride migration test <i>Chung-Chia Yang and Chih-Hsin Liang</i>	892
Two-phase optimized inverse kinematics for motion replication of real human models <i>Ming-June Tsai and Hsueh-Yung Lung</i>	899
Blockage effects on surface pressures: the case of an inclined flat plate with and without a guide plate <i>Kung-Ming Chung, Chin-Chang Chou and Keh-Chin Chang</i>	915
The frequency dependence of biological activation in the ultrasonic stimulation of <i>Artemia</i> cysts <i>Shiuh-Kuang Yang and Yi-Cheng Huang</i>	923
Movement modeling and control of precession mechanism for bonnet polishing based on static highest-stiffness strategy <i>Ri Pan, Zhen-zhong Wang, Chun-jin Wang, Dong-xu Zhang, Yin-hui Xie and Yin-biao Guo</i>	932
Analysis of effect of cycle spinning on wavelet- and curvelet-based denoising methods on brain CT images <i>H.S. Bhadauria and M.L. Dewal</i>	939
Using a passive filter to suppress harmonic and resonance effects on railway power systems <i>Wei-Hsiang Ko and Jyh-Cherng Gu</i>	946
Adaptive Markov transition matrix based multiple targets tracking for phased array radar <i>Fei Wang, Zhenkai Zhang, Mathini Sellathurai and Jianjiang Zhou</i>	955
