JOURNAL OF PROPULSION AND POWER

VOLUME 30, NUMBER 6

NOVEMBER–DECEMBER 2014

FULL-LENGTH PAPERS

Experimental Performance Characterization of a Two-Hundred-Watt Quad Confinement Thruster	A. Knoll, T. Harle, V. Lappas, M. Pollard	1445
Numerical Analysis of Neutral Entrainment Effect on Field-Reversed Configuration Thruster Efficiency	J. Brackbill, J.-L. Cambier, N. E. Gimelshein, S. F. Gimelshein	1450
Investigation of the Plasma Current Density of a Pulsed Plasma Thruster	M. Lau, S. Manna, G. Herdrich, T. Schönherr, K. Komurasaki	1459
Role of a Conducting Vacuum Chamber in the Hall Effect Thruster Electrical Circuit	J. D. Frieman, S. T. King, M. L. R. Walker, V. Khayms, K. David	1471
To Mars in Weeks by Thermonuclear Microbomb Propulsion	F. Winterberg	1480
Repetitive Pulse Performance of One-Micrometer Laser-Ablation Propulsion onto Aluminum	H. Tsuruta, B. Wang, Z. Wang, S. Yokota, A. Sasoh	1485
Design Optimization and Experimental Study of Tandem Impeller for Centrifugal Compressor	Y. P. Ju and C. H. Zhang	1490
Geometry-Grid Generation for Three-Dimensional Multidisciplinary Simulations in Multistage Turbomachinery	R. L. Davis and J. P. Clark	1502
Control of Tip Leakage Vortex Breakdown by Tip Injection in Unshrouded Turbines	J. Gao, Q. Zheng, P. Dong, X. Zha	1510
Influence of Pipe Length on Cavitation Surge Frequency in a Cascade	Y. Iga and Y. Yoshida	1520
Time-Resolved Flow Properties in a Turbine Driven by Pulsed Detonations	K. P. Rouser, P. I. King, F. R. Schauer, R. Sondergaard, J. L. Hoke, L. P. Goss	1528
Experimental Investigation of Supersonic Model Combustor with Distributed Injection of Supercritical Kerosene	M.-B. Sun, Z. Zhong, J.-H. Liang, Z.-G. Wang	1537
Thermal Radiative Simulations and Measurements of a Scramjet Test Rig	A. J. Crow, I. D. Boyd, M. S. Brown, J. Liu	1543
Spatially Resolved Water Measurements in a Scramjet Combustor Using Diode Laser Absorption	I. A. Schultz, C. S. Goldenstein, J. B. Jeffries, R. K. Hanson, R. D. Rockwell, C. P. Goynes	1551
Quasi-One-Dimensional Multimodes Analysis for Dual-Mode Scramjet	L. Tian, L. Chen, Q. Chen, F. Li, X. Chang	1559
Velocimetry Measurements of a Scramjet Cavity Flameholder with Inlet Distortion	J. W. Kirik, C. P. Goynes, S. J. Peltier, C. D. Carter, M. A. Hagenmaier	1568
Ethylene Flame Dynamics and Inlet Unstart in a Model Scramjet	Q. Liu, A. Passaro, D. Baccarella, H. Do	1577

CONTENTS—continued

Hypersonic Scramjet Testing via Diode Laser Absorption in a Reflected Shock Tunnel	I. A. Schultz, C. S. Goldenstein, C. L. Strand, J. B. Jeffries, R. K. Hanson, C. P. Goyne	1586
Multispecies Midinfrared Absorption Measurements in a Hydrocarbon-Fueled Scramjet Combustor	I. A. Schultz, C. S. Goldenstein, R. M. Spearin, J. B. Jeffries, R. K. Hanson, R. D. Rockwell, C. P. Goyne	1595
Experimental Identification of Transient Dynamics for Supersonic Inlet Unstart	K. E. Hutchins, M. R. Akella, N. T. Clemens, J. M. Donbar, S. Gogineni	1605
Analysis of Acoustics and Vortex Shedding Interactions in Hybrid Rocket Motors	D. Pastrone, L. Casalino, C. Carmicino	1613
Combustion Characteristics of a Coaxial Porous Injector	D. Kim, G. Lee, J. Koo	1620
Improved Semiempirical Correlation to Predict Sauter Mean Diameter for Pressure-Swirl Atomizers	X. Wei and H. Yong	1628
Digital Holographic Analysis of the Near Field of Aerated-Liquid Jets in Crossflow	D. S. Olinger, K. A. Sallam, K.-C. Lin, C. D. Carter	1636
Network Flow Simulation of Fluid Transients in Rocket Propulsion Systems	A. Bandyopadhyay and A. Majumdar	1646
Multifidelity Multidisciplinary Whole-Engine Thermomechanical Design Optimization	D. J. J. Toal, A. J. Keane, D. Benito, J. A. Dixon, J. Yang, M. Price, T. Robinson, A. Remouchamps, N. Kill	1654
Experimental Investigation of the Decomposition Preceding Cookoff in a Composite Propellant	T. D. Hedman, M. L. Gross, J. J. Davis, N. D. Davis, K. P. Ford, A. I. Atwood	1667
Solid-Fuel Regression Rates and Flame Characteristics in an Opposed Flow Burner	S. C. Shark, C. R. Zaseck, T. L. Pourpoint, S. F. Son	1675
Modification of Flow Characteristics on the Blowing Surface by Inserting a Diaphragm	K. Mon, C. Park, C. Lee	1683
Development of an Aeroelastic Modeling Capability for Transient Nozzle Flow Analysis	T.-S. Wang, X. Zhao, S. Zhang, Y.-S. Chen	1692
Electrospray of 1-Butyl-3-Methylimidazolium Dicyanamide Under Variable Flow Rate Operations	S. W. Miller, B. D. Prince, R. J. Bemish, J. L. Rovey	1701
Element Potential-Based Procedure for Metamodeling of Combustion Products	M. A. T. Walter and P. R. Owen	1711
TECHNICAL NOTES		
Investigation on Hypersonic Inlet Starting Process in Continuous Freejet Wind Tunnel	Y. Wang, Z. Wang, J. Liang, X. Fan	1721
Development of a Three-Dimensional Printed, Liquid-Cooled Nozzle for a Hybrid Rocket Motor	N. Quigley and J. E. Lyne	1726
Asymptotic Stability of a Supercritical Planar Sheet with Coflow Gas	Q.-F. Fu, S.-G. Wang, R.-Z. Duan	1727
