Volume 15, Number 2

Articles in the Issue:

Review Article:

Cristóbal A. Navarro, Nancy Hitschfeld-Kahler and Luis Mateu
A survey on parallel computing and its applications in data-parallel problems using GPU architectures.
Commun. Comput. Phys., 15 (2014), pp. 285-329.
Published Online: September 10, 2013. Abstract

Full Article

[*An open-access article; the PDF is free to any online user.*]

Regular Articles:

Marie Billaud Friess, Jérôme Breil, Pierre-Henri Maire and Mikhail Shashkov
A multi-material CCALE-MOF approach in cylindrical geometry.
Commun. Comput. Phys., 15 (2014), pp. 330-364.
Published Online: September 10, 2013. Abstract

Full Article

Hualong Feng, Amlan Barua, Shuwang Li and Xiaofan Li
A parallel adaptive treecode algorithm for evolution of elastically stressed solids.
Commun. Comput. Phys., 15 (2014), pp. 365-387.
Published Online: September 10, 2013. Abstract

Full Article

Renkai Hong, Zhenhua Xia, Yipeng Shi, Zuoli Xiao and Shiyi Chen
Constrained large-eddy simulation of compressible flow past a circular cylinder.
Commun. Comput. Phys., 15 (2014), pp. 388-421.
Published Online: September 10, 2013. Abstract

Full Article

Jessy Mallet, Stéphane Brull and Bruno Dubroca
An entropic scheme for an angular moment model for the classical Fokker-Planck-Landau equation of electrons.
Commun. Comput. Phys., 15 (2014), pp. 422-450.
Published Online: September 10, 2013. Abstract

Full Article

Jian-Jun Xu, Yunqing Huang, Ming-Chih Lai and Zhilin Li
A coupled immersed interface and level set method for three-dimensional interfacial flows with insoluble surfactant.
Commun. Comput. Phys., 15 (2014), pp. 451-469.
Published Online: September 10, 2013. Abstract

Full Article

Jingrun Chen, Pingbing Ming and Jerry Zhijian Yang
A constrained Cauchy-Born elasticity accelerated multigrid method for nanoindentation.
Commun. Comput. Phys., 15 (2014), pp. 470-486.
Published Online: September 10, 2013. Abstract

Full Article

Tobias Gebäck and Alexei Heintz
A lattice Boltzmann method for the advection-diffusion equation with Neumann boundary conditions.
Commun. Comput. Phys., 15 (2014), pp. 487-505.
Published Online: September 27, 2013. Abstract

Full Article

John W. Barrett, Harald Garcke and Robert Nürnberg
Phase field models versus parametric front tracking methods: Are they accurate and computationally efficient?.
Commun. Comput. Phys., 15 (2014), pp. 506-555.
Published Online: September 27, 2013. Abstract

Full Article

Vandana Gairola and P. D. Semalty
Vibrational properties of vacancy in Na and K using MEAM potential.
Commun. Comput. Phys., 15 (2014), pp. 556-568.
Published Online: October 8, 2013. Abstract

Full Article
