Volume 15, Number 5

Articles in the Issue:

Regular Articles:

Remi Abgrall and Harish Kumar
Numerical approximation of a compressible multiphase system.
Commun. Comput. Phys., 15 (2014), pp. 1237-1265.
Published Online: January 30, 2014. Abstract

Full Article

M. Bergmann, J. Hovnanian and A. Iollo
An accurate cartesian method for incompressible flows with moving boundaries.
Commun. Comput. Phys., 15 (2014), pp. 1266-1290.
Published Online: February 14, 2014. Abstract

Full Article

Giacomo Dimarco, Lorenzo Pareschi and Vittorio Rispoli
Implicit-explicit Runge-Kutta schemes for the Boltzmann-Poisson system for semiconductors.
Commun. Comput. Phys., 15 (2014), pp. 1291-1319.
Published Online: February 14, 2014. Abstract

Full Article

Zhijun Shen, Wei Yan and Guangwei Yuan
A stability analysis of hybrid schemes to cure shock instability.
Commun. Comput. Phys., 15 (2014), pp. 1320-1342.
Published Online: February 14, 2014. Abstract

Full Article

H. Yan, K. Li, R. Khatiwada, E. Smith, W. M. Snow, C. B. Fu, P.-H. Chu, H. Gao and W. Zheng
A frequency determination method for digitized NMR signals.
Commun. Comput. Phys., 15 (2014), pp. 1343-1351.
Published Online: February 21, 2014. Abstract

Full Article

Mervlyn Moodley
The lognormal distribution and quantum Monte Carlo data.
Commun. Comput. Phys., 15 (2014), pp. 1352-1367.
Published Online: February 26, 2014. Abstract

Full Article

Zhenning Cai, Yuwei Fan, Ruo Li and Zhonghua Qiao
Dimension-reduced hyperbolic moment method for the Boltzmann equation with BGK-type collision.
Commun. Comput. Phys., 15 (2014), pp. 1368-1406.
Published Online: March 5, 2014. Abstract

Full Article

J. Kaupuzs, R. V. N. Melnik and J. Rimsans
Correlation functions, universal ratios and Goldstone mode singularities in n-vector models.
Commun. Comput. Phys., 15 (2014), pp. 1407-1430.
Published Online: March 5, 2014. Abstract

Full Article

D. Levadoux, F. Millot and S. Pernet
An unpreconditioned boundary-integral for iterative solution of scattering problems with non-constant Leontovitch impedance boundary conditions.
Commun. Comput. Phys., 15 (2014), pp. 1431-1460.
Published Online: March 5, 2014. Abstract

Full Article

Lin Mu, Junping Wang, Xiu Ye and Shan Zhao
A numerical study on the weak Galerkin method for the Helmholtz equation.
Commun. Comput. Phys., 15 (2014), pp. 1461-1479.
Published Online: March 12, 2014. Abstract

Full Article

Motong Qiao, Wei Wang and Michael Ng

Multi-phase texture segmentation using Gabor features histograms based on Wasserstein distance.
Commun. Comput. Phys., 15 (2014), pp. 1480-1500.
Published Online: March 14, 2014. Abstract

Author index to volume 15
Commun. Comput. Phys., 15 (2014), pp. 1501-1503.
