Features

Security and piracy

Years of terrorism continues to make the industry sensitive to onboard security

Medical and health

Research into changes over time in the physical physique of offshore workers could trigger a safety shake-up

Navigation and bridge

Fog bridge training keeps seafarers up to speed when visibility is limited

on the cover

Research by Aberdeen's Robert Gordon University has revealed that offshore workers are on average both larger and heavier than they were 30 years ago. In our medical and health feature on **page 22** we consider the possible implications for the design of lifesaving equipment
