## In this issue

(23 articles)

Page 1 of 2

OriginalPaper

### Numerical investigation of the dynamics for low tension marine cables

Bin Chen 陈斌, Feng Su 苏锋, Cun-feng Huo 霍存锋...

Pages 257-264

OriginalPaper

### Fata fusion algorithm for multi-sensor dynamic system based on interacting multiple model

Zhi-feng Chen 陈志锋, Yun-ze Cai 蔡云泽

Pages 265-272

OriginalPaper

### A polynomial time algorithm for checking regularity of totally normed process algebra

Fei Yang 杨非, Hao Huang 黄浩

Pages 273-280

OriginalPaper

### Investigating the interaction between *Gluconobacter oxydans* and *Bacillus megaterium* for 2-keto-L-gulonic acid biosynthesis in the two-step vitamin C fermentation

Zhi-xiong Zhang 张志雄, Jun-wei Sun 孙君伟...

Pages 281-285

OriginalPaper

### A Micro-Electro-Mechanical System-based bulk acoustic wave piezoelectric disk resonator for detecting z-axis rotation rate

Zhong-xing Xu 许仲兴, Wei-ping Zhang 张卫平...

Pages 286-292

 OriginalPaper

## Optimal burn-in and preventive maintenance modeling with competing failure processes

Wen-ping Huang 黄文平, Jing-lun Zhou 周经伦...

Pages 293-297

 OriginalPaper

## Study on probability plot correlation coefficient of the log-Weibull distribution

Ren-yan Jiang 蒋仁言

Pages 298-301

 OriginalPaper

## Validation metric of degradation model with dynamic performance

Chun-bo Yang 阳纯波, Sheng-kui Zeng 曾声奎...

Pages 302-306

 OriginalPaper

## Reliability analysis of retracting actuator with multi-state based on goal oriented methodology

Lin-gan Zhou 周琳珩, Hai-ping Dong 董海平...

Pages 307-311

 OriginalPaper

## Reliability Copula model for wind turbine gearbox based on failure correlation

Zong-wen An 安宗文, Yu Zhang 张宇...

Pages 312-316

 OriginalPaper

## Reliability prediction method based on state space model for rolling element bearing

Hong-kun Li 李宏坤, Zhi-xin Zhang 张志新...

Pages 317-321

 OriginalPaper

# Optimal preventive maintenance policy with consideration of production wait

Wen-bin Wang 王文彬, Ping Li 李 婷, Rui Peng 彭 锐

Pages 322-325

---

OriginalPaper

# Effect of fluid-structure interaction on sealed flow field and leakage rate based on computational fluid dynamics

He-nan Tang 汤赫男, Shi-jie Wang 王世杰...

Pages 326-330

---

OriginalPaper

# Stochastic fatigue life and reliability prediction based on residual strength

Fang-jun Zuo 左芳君, Shun-peng Zhu 朱顺鹏...

Pages 331-337

---

OriginalPaper

# Uncertainty quantification for structural optimal design based on evidence theory

Sheng-yong Hu 胡盛勇, Jun Luo 罗 军

Pages 338-343

---

OriginalPaper

# Reliability analysis of excavator rectifier feedback system with multi-state components based on belief universal generating function method

Jin-hua Mi 米金华, Yan-feng Li 李彦锋...

Pages 344-348

---

OriginalPaper

# Multi-point and multi-interval availabilities for Markov repairable systems with history-dependent up and down states

Wen-guang Wang 王文光, Shi-jia Du 杜时佳...

Pages 349-352

---

OriginalPaper

# Transformer fault analysis based on Bayesian networks and importance measures

Fang-yu Ren 任方宇, Shu-bin Si 司书宾...

Pages 353-357

OriginalPaper

# Primary research on real-time fault diagnosis platform for fuel tank system of an aircraft

Yong-lin Bao 鲍泳林

Pages 358-362

OriginalPaper

# A fuzzy fault diagnosis method for large radar based on directed graph model

Lu Bai 白璐, Cheng-lie Du 杜承烈...

Pages 363-369

A research for error comp

 OriginalPaper

## A research for error compensation algorithm of Dual Range Pressure Sensor

Zhao-yang Wang 王朝阳, Hai-bin Li 李海滨...

Pages 370-373

---

 OriginalPaper

## Optimal age replacement policy with replacement occurrence while the warranty is in effect

Minjae Park, Ki Mun Jung, Dong Ho Park

Pages 374-379

---

 OriginalPaper

## Monotonicity evaluation method of monitoring feature series based on ranking mutual information

Chun-yu Zhao 赵春宇, Jing-jiang Liu 刘景江...

Pages 380-384
