In this issue

(20 articles)

OriginalPaper

Dynamic modeling and active control of a strap-on launch vehicle

Pan Liu 刘盼, Shaojing Guo 郭绍静...

Pages 385-394

OriginalPaper

Coupled heat and mass transfer analysis of $\text{NH}_3\text{-H}_2\text{O}$ falling film absorption on inner tube surface with low solution flow rates

Peng Lin 林梵, Ruzhu Wang 王如竹

Pages 395-405

OriginalPaper

Investigation on the formation mechanism of ordered carbide $(\text{FeMn})_3\text{AlC}$ in the Al added twinning-induced plasticity steels

Lieduo Yang 杨列多, Feng Huang 黄峰...

Pages 406-410

OriginalPaper

Effect of width-to-thickness ratio and thickness profile changing on the critical instable shape during cold strip rolling

Lei Song 宋蕾, Minggang Shen 沈明钢...

Pages 411-418

OriginalPaper

A hybrid firefly algorithm for optimizing fractional proportional-integral-derivative controller in ship steering

Han Xue 薛晗, Zheping Shao 邵哲平...

Pages 419-423

OriginalPaper

A comprehensive evaluation method for kinematic accuracy of space manipulator based on analytic hierarchy process

Xi Xiang 项溪, Xiaomin Zhu 朱晓敏...

Pages 424-432

 OriginalPaper

Fault reconfiguration of shipboard power system based on triple quantum differential evolution algorithm

Congjiao Wang 王丛佼, Xihuai Wang 王锡淮...

Pages 433-442

 OriginalPaper

Study on launch dynamics of the tank marching fire

Feifei Liu 刘飞飞, Xiaoting Rui 芮筱亭...

Pages 443-449

 OriginalPaper

Influence of the type of the pulverized coal concentrator on the operation of a tangential fired boiler with horizontal bias combustion

Xiaoyan Guan 管晓艳, Xinli Zou 邹新丽...

Pages 450-456

 OriginalPaper

Rigid-flex coupling modeling and simulation on multistage gear transmission system

Jie Zhou 周杰, Yunxian Jia 贾云献, Xin Liu 刘鑫...

Pages 457-461

 OriginalPaper

Modeling the effect of environmental conditions on reliability of wind turbines

Renyan Jiang 蒋仁言, Ruizhi Huang 黄睿智...

Pages 462-466

 OriginalPaper

A new hybrid reliability index definition and its application to the structure buckling reliability analysis of supercavitating projectiles

 OriginalPaper

Human reliability analysis method on armored vehicle system considering error correction

Xiaojian Yi 伊泉剑, Haiping Dong 董海平...

Pages 472-477

 OriginalPaper

Bayesian reliability assessment and degradation modeling with calibrations and random failure threshold

Jinbo Huang 黄金波, Dejing Kong 孔德景...

Pages 478-483

 OriginalPaper

Wind turbine gearbox reliability analysis based on the system level stress-strength model

Bo Liu 刘波, Zongwen An 安宗文, Haixia Kou 寇海霞

Pages 484-488

 OriginalPaper

Binary decision diagram quantitative analysis method based on fuzzy set theory

Le Yu 于乐, Mei Jiang 姜梅, Zheng Liu 刘征...

Pages 489-493

 OriginalPaper

Topology optimization design and strength analysis of the hoist bracket for rescue helicopters

Zhijie Liu 刘志杰, Lizhao Wang 王礼钊...

Pages 494-498

 OriginalPaper

Maintenance decision making model with multiple attribute optimization

Zhiqiang Cai 蔡志强, Yang Li 李洋...

Pages 499-503

OriginalPaper

Fault tree analysis of feeding control system for computer numerical control heavy-duty horizontal lathes with multiple common cause failure groups

Jinhua Mi 米金华, Yanfeng Li 李彦峰...

Pages 504-508

OriginalPaper

Memory based scheme to monitor non-random small shift patterns in manufacturing process

Mansoor Khan, Lirong Cui 崔利荣

Pages 509-512
