## CONTENTS

Preface .....	1-2
<b>Articles</b>	
H. IWAI, S. ISHII, S. KAWAMURA, E. SATO, and K. KUSUNOKI: Case Study on Convection Initiation Associated with an Isolated Convective Storm Developed over Flat Terrain during TOMACS .....	3-23
S. SUZUKI, T. MAESAKA, K. IWANAMI, S. SHIMIZU, and K. KIEDA: X-Band Dual-Polarization Radar Observations of the Supercell Storm that Generated an F3 Tornado on 6 May 2012 in Ibaraki Prefecture, Japan .....	25-33
Y. SETO, H. YOKOYAMA, T. NAKATANI, H. ANDO, N. TSUNEMATSU, Y. SHOJI, K. KUSUNOKI, M. NAKAYAMA, Y. SAITOH, and H. TAKAHASHI: Relationships among Rainfall Distribution, Surface Wind, and Precipitable Water Vapor during Heavy Rainfall in Central Tokyo in Summer .....	35-49
R. MISUMI, N. SAKURAI, T. MAESAKA, S. SUZUKI, S. SHIMIZU, and K. IWANAMI: Transition Process from Non-Precipitating Cumuli to Precipitating Convective Clouds over Mountains: Observation by Ka-Band Doppler Radar and Stereo Photogrammetry .....	51-66
H. SUGAWARA, R. ODA, and N. SEINO: Urban Thermal Influence on the Background Environment of Convective Precipitation .....	67-76
S. BÉLAIR, S. LEROYER, N. SEINO, L. SPACEK, V. SOUVANLASY, and D. PAQUIN-RICARD: Role and Impact of the Urban Environment in a Numerical Forecast of an Intense Summertime Precipitation Event over Tokyo .....	77-94
T. SANO and S. OISHI: Observational Study on Formation of a Localized Rainfall on a Basin with Heat and Aridity on Days of Weak Synoptic Disturbance in Summer .....	95-117
V. CHANDRASEKAR, H. CHEN, and B. PHILIPS: Principles of High-Resolution Radar Network for Hazard Mitigation and Disaster Management in an Urban Environment .....	119-139
R. CIFELLI, V. CHANDRASEKAR, H. CHEN, and L. E. JOHNSON: High Resolution Radar Quantitative Precipitation Estimation in the San Francisco Bay Area: Rainfall Monitoring for the Urban Environment .....	141-155
T. KAWABATA, H.-S. BAUER, T. SCHWITALLA, V. WULFMAYER, and A. ADACHI: Evaluation of Forward Operators for Polarimetric Radars Aiming for Data Assimilation .....	157-174
K. SAITO, M. KUNII, and K. ARAKI: Cloud Resolving Simulation of a Local Heavy Rainfall Event on 26 August 2011 Observed in TOMACS .....	175-199
K. HIRANO and M. MAKI: Imminent Nowcasting for Severe Rainfall Using Vertically Integrated Liquid Water Content Derived from X-Band Polarimetric Radar .....	201-220
N. SEINO, R. ODA, H. SUGAWARA, and T. AOYAGI: Observations and Simulations of the Mesoscale Environment in TOMACS Urban Heavy Rain Events .....	221-245
A. J. PEREIRA FILHO, F. VEMADO, K. SAITO, H. SEKO, J. L. FLORES ROJAS, and H. A. KARAM: ARPS Simulations of Convection during TOMACS .....	247-263
