Modified Discrete Glowworm Swarm Optimization Algorithm Based on Time Window Division for Multi-objective VRPTW Modified Discrete Glowworm Swarm Optimization Algorithm Based on Time Window Division for Multi-objective VRPTW

A Performance-oriented Resource Allocation Algorithm with Insertion and Duplication for IaaS Clouds A Performance-oriented Resource Allocation Algorithm with Insertion and Duplication for IaaS Clouds

Health Evaluation of a Domain Name System Based on the Analytic Hierarchy Process Health Evaluation of a Domain Name System Based on the Analytic Hierarchy Process

An Approach to Improve Efficiency of Traditional Automated Trust Negotiation Strategies An Approach to Improve Efficiency of Traditional Automated Trust Negotiation Strategies

Web Service Aggregation and Selection Based on Join Operation in RDB Web Service Aggregation and Selection Based on Join Operation in RDB

Android App Copy Protection Mechanism with Semi-trusted Loader Android App Copy Protection Mechanism with Semi-trusted Loader

QoS-Aware Routing in Wireless Networks Using Aerial Vehicles QoS-Aware Routing in Wireless Networks Using Aerial Vehicles

Fingerprint Liveness Detection Adapted to Different Fingerprint Sensors Based on Multiscale Wavelet Transform and Rotation-Invarient Local Binary Pattern Fingerprint Liveness Detection Adapted to Different Fingerprint Sensors Based on Multiscale Wavelet Transform and Rotation-Invarient Local Binary Pattern

Bit Rate-based H.264 Video Copy Detection Bit Rate-based H.264 Video Copy Detection

An Energy Conserving Reversible and Irreversible Digital Watermarking Hybrid Scheme for Cluster-based Wireless Sensor Networks An Energy Conserving Reversible and Irreversible Digital Watermarking Hybrid Scheme for Cluster-based Wireless Sensor Networks

An Energy-balanced Cluster Head Selection Method for Clustering Routing in WSN An Energy-balanced Cluster Head Selection Method for Clustering Routing in WSN

A List-wise Matrix Factorization Based POI Recommendation by Fusing Multi-Tag, Social and Geographical Influences A List-wise Matrix Factorization Based POI Recommendation by Fusing Multi-Tag, Social and Geographical Influences

Lyapunov-based Traffic Scheduling and Optimization in Smart Distribution Grid Communication Networks Lyapunov-based Traffic Scheduling and Optimization in Smart Distribution Grid Communication Networks

A Secure Three Party Node Authentication and Key Establishment Scheme for the Internet of Things Environment A Secure Three Party Node Authentication and Key Establishment Scheme for the Internet of Things Environment

A Tool for Access Control Policy Validation A Tool for Access Control Policy Validation

A Secure Multi-keyword Ranked Search over Encrypted Cloud Data against Memory Leakage Attack A Secure Multi-keyword Ranked Search over Encrypted Cloud Data against Memory Leakage Attack

A Queueing Model Based Periodical ACPI Global State Control for Web Server Cluster Energy Management A Queueing Model Based Periodical ACPI Global State Control for Web Server Cluster Energy Management

Hybrid Clouds for Web Systems: Usability and Performance Hybrid Clouds for Web Systems: Usability and Performance

A State-Space Approach for Service-oriented SLA Translation A State-Space Approach for Service-oriented SLA Translation

Logic and Event Based Semantic Relationship Evolution in Service Semantic Link Network Logic and Event Based Semantic Relationship Evolution in Service Semantic Link Network

A Performance-oriented Resource Allocation Algorithm with Insertion and Duplication for IaaS Clouds A Performance-oriented Resource Allocation Algorithm with Insertion and Duplication for IaaS Clouds

A Two-Stage Failover Mechanism for High Availability in Service Function Chaining A Two-Stage Failover Mechanism for High Availability in Service Function Chaining

An Energy-efficient Secure AODV Protocol in Industrial Sensor Network An Energy-efficient Secure AODV Protocol in Industrial Sensor Network

Social Network Anonymization via Local-perturbing Approach Social Network Anonymization via Local-perturbing Approach

A Comparison Model for WLAN Technologies, 802.11n and HeNB in LTE and the Future 5G Networks A Comparison Model for WLAN Technologies, 802.11n and HeNB in LTE and the Future 5G Networks

Overload Control Technique for MTC Communications in Wireless Cellular Networks Overload Control Technique for MTC Communications in Wireless Cellular Networks

Designing VNT Candidates Robust Against Network Failures Designing VNT Candidates Robust Against Network Failures

High Precision Vehicle Positioning: Towards Cooperative Driving Based on VANET High Precision Vehicle Positioning: Towards Cooperative Driving Based on VANET

Fog Computing Service Orchestration Mechanisms for 5G Networks Fog Computing Service Orchestration Mechanisms for 5G Networks

Position-freshness Based Intermediate Vehicle Filtering Layer with Intersection Detection for VANET Position-freshness Based Intermediate Vehicle Filtering Layer with Intersection Detection for VANET
