

201811 (19:6期)期所有篇

- [A Robust GA/PSO-Hybrid Algorithm in Intelligent Shipping Route Planning Systems for Maritime Traffic Networks](#) A Robust GA/PSO-Hybrid Algorithm in Intelligent Shipping Route Planning Systems for Maritime Traffic Networks
- [A Component-based Middleware for Network Function Virtualization](#) A Component-based Middleware for Network Function Virtualization
- [Web API Discovery Using Semantic Similarity and Hungarian Algorithm](#) Web API Discovery Using Semantic Similarity and Hungarian Algorithm
- [Outage Performance Analysis of Cooperative D2D Communication](#) Outage Performance Analysis of Cooperative D2D Communication
- [Adaptive Caching Strategy Based on Big Data Learning in ICN](#) Adaptive Caching Strategy Based on Big Data Learning in ICN
- [A Recommendation System for Repetitively Purchasing Items in E-commerce Based on Collaborative Filtering and Association Rules](#) A Recommendation System for Repetitively Purchasing Items in E-commerce Based on Collaborative Filtering and Association Rules
- [Agile Business Intelligence: Combining Big Data and Business Intelligence to Responsive Decision Model](#) Agile Business Intelligence: Combining Big Data and Business Intelligence to Responsive Decision Model
- [Multi-label Scientific Document Classification](#) Multi-label Scientific Document Classification
- [\$\alpha\$ -Fraction First Strategy for Hierarchical Model in Wireless Sensor Networks](#) α -Fraction First Strategy for Hierarchical Model in Wireless Sensor Networks
- [An Energy-aware Method for Multi-domain Service Function Chaining](#) An Energy-aware Method for Multi-domain Service Function Chaining
- [Proposed Method for Mobile Forensics Investigation Analysis of Remnant Data on Google Drive Client](#) Proposed Method for Mobile Forensics Investigation Analysis of Remnant Data on Google Drive Client

- A Secure Service Agreement Underlying Cloud Computing Environment A Secure Service Agreement Underlying Cloud Computing Environment
- Addressing Data Governance in Cloud Storage: Survey, Techniques and Trends Addressing Data Governance in Cloud Storage: Survey, Techniques and Trends
- An Improved RFID Authentication Protocol with Privacy Protection Based on Chaotic Maps An Improved RFID Authentication Protocol with Privacy Protection Based on Chaotic Maps
- An Improved Integrated Prediction Method of Cyber Security Situation Based on Spatial-time Analysis An Improved Integrated Prediction Method of Cyber Security Situation Based on Spatial-time Analysis
- Efficient Data-replication between Cluster-heads for Solar-powered Wireless Sensor Networks with Mobile Sinks Efficient Data-replication between Cluster-heads for Solar-powered Wireless Sensor Networks with Mobile Sinks
- Indoor Positioning Systems for Different Mobile Terminal Devices Indoor Positioning Systems for Different Mobile Terminal Devices
- Data Synchronization of Mobile Peer-to-Peer Application: Experiments on the Android Platform Data Synchronization of Mobile Peer-to-Peer Application: Experiments on the Android Platform
- High Efficient and Robust Quantum Watermarking Algorithm Based on Quantum Log-polar Images and Matrix Coding High Efficient and Robust Quantum Watermarking Algorithm Based on Quantum Log-polar Images and Matrix Coding
- Limited-length Suffix-array-based Method for Variable-length Motif Discovery in Time Series Limited-length Suffix-array-based Method for Variable-length Motif Discovery in Time Series
- Tracking Control of Wheeled Mobile Robots Using Fuzzy CMAC Neural Networks Tracking Control of Wheeled Mobile Robots Using Fuzzy CMAC Neural Networks
- Two-dimensional Channel Estimation for Millimeter-wave MIMO Systems with Hybrid Precoding Two-dimensional Channel Estimation for Millimeter-wave MIMO Systems with Hybrid Precoding

- Research on Mobile Robot Target Recognition and Obstacle Avoidance Based on Vision Research on Mobile Robot Target Recognition and Obstacle Avoidance Based on Vision
- A Recoverable Image Authentication Scheme by Reed-Solomon Code A Recoverable Image Authentication Scheme by Reed-Solomon Code
- Space Efficient and Integrity-ensured Secret Sharing Schemes for Multimedia Secrecy without Recursion Space Efficient and Integrity-ensured Secret Sharing Schemes for Multimedia Secrecy without Recursion
- A New Blind Image Authentication for Image Tampering Detection and Recovery Based on Block-wise Feature Classification A New Blind Image Authentication for Image Tampering Detection and Recovery Based on Block-wise Feature Classification
- Fine-grained Image Authorization Mechanism for Image Management Systems Fine-grained Image Authorization Mechanism for Image Management Systems
- A New Third-party Payment Scheme with Anonymity for Mobile Commerce A New Third-party Payment Scheme with Anonymity for Mobile Commerce
- Finding An Optimal Disturbed Square Matrix Using Dynamic Programming Strategy for Steganography Finding An Optimal Disturbed Square Matrix Using Dynamic Programming Strategy for Steganography
- An Examination of Online Discussion Quality of STEM-based Instruction An Examination of Online Discussion Quality of STEM-based Instruction
- Development and Research of an Affective Learning System Combined with Motion-Sensing Interaction, Augmented Reality, and Mid-Air Projection Development and Research of an Affective Learning System Combined with Motion-Sensing Interaction, Augmented Reality, and Mid-Air Projection
