

TABLE OF CONTENTS

VOLUME 11, ISSUE 2, 2018

Modelling of a Variable Displacement Lubricating Pump with Air Dissolution Dynamics

Massimo Rundo, Raffaele Squarcini, and Francesca Furno | **111**

Complete Engine Thermal Model, a Comprehensive Approach

Mirko Bovo | **127**

Experimental Investigation of the Influence of Engine Operating Parameters on a Rankine Based Waste Heat Recovery System in a SI Engine

Thomas Matousek, Paul Lagaly, Michael Bens, and Thomas Koch | **147**

Influence of Miller Cycles on Engine Air Flow

Marco Braun, Michael Klaas, and Wolfgang Schröder | **161**

Partial Transparency of Advanced Compression Ignition Combustion Chamber Deposits, Its Impact on Combustion Chamber Wall Temperatures and Application to Thermal Barrier Coating Design

Mark Hoffman, Ryan O'Donnell, and Zoran Filipi | **179**

Internal Combustion Engine Cylinder Volume Trace Deviation

Ivan Anagrius West, Carlos Jorques Moreno, Ola Stenläås, Fredrik Haslestad, and Ola Jönsson | **195**

Elasto-Hydrodynamic Bearing Model in Powertrain Multi-Body Simulation

Arthur Back | **215**

The Effect of Inlet Valve Timing and Engine Speed on Dual Fuel NG-Diesel Combustion in a Large Bore Engine

Stefan Weber, Richard Stegmann, Maximilian Prager, and Georg Wachtmeister | **229**
