

JOURNAL OF CIRCUITS, SYSTEMS, AND COMPUTERS

Vol. 19, No. 6 (October 2010)

CONTENTS

- Quantum Singular Value Decomposition Based Approximation
Algorithm 1141
L. Gyongyosi and S. Imre
- A Systematic Computer-Aided Approach to Low-Noise Amplifier Design 1163
N. Roy, G. McCormick, V. Devabhaktuni and R. Raut
- A Compact High-Speed Low-Power Rail-to-Rail Buffer Amplifier for
Step-Pulse Signals 1181
C.-W. Lu and C.-M. Hsiao
- Autonomous Group Testing Based Fault Tolerance in Reconfigurable
Logic Devices 1199
J. Sababeh and K. Mohammadi
- Routing Aware Placement Algorithm and Efficient Free Space
Management for Reconfigurable Systems 1217
M. Esmacildoust and A. Zakerolhosseini
- Accelerating Java Interpretation in Low-Cost Embedded Processors 1235
T.-K. Kim, J.-S. Lee and H.-C. Oh
- A Single-Stage Phase-Shifted Full-Bridge Electronic Ballast for
High-Pressure Mercury Lamps 1245
*H.-J. Chiu, Y.-K. Lo, C.-J. Yao, C.-C. Chuang, M.-H. Tseng,
J.-J. Lin, H.-M. Huang and C.-C. Kann*
- New Identification Procedure for Continuous-Time Radio Frequency
Power Amplifier Model 1259
S. Bachir and C. Duvaud
- A Novel Design Methodology for Reducing Simultaneous Switching
Noise Evaluated by a Differential-IBIS Structure 1275
W.-T. Huang, S.-Y. Tan and Y.-J. Chang

CONTENTS — (Continued)

A Fully Integrated Multi-Band LCVCO Based on CMOS Technology <i>X. Ma, W. Zhang and Y. Liu</i>	1299
Color Images Segmentation Algorithms During a Sports Meeting: Application to Soccer Video Images <i>M. M. Jlassi, A. Douik and H. Messaoud</i>	1307
An Efficient Spice-Based Technique for Performance Characterization of BJT Mixers <i>R. Raut, V. Devabhaktuni and N. Roy</i>	1333
Design and Stability Analysis of Mixed-Mode Filters Containing only Grounded Capacitors <i>E. Yuce and S. Tokat</i>	1345
A Compact CMOS Power-on-Reset Pulse Generator Design with Low-Power and Wide Operation Range <i>S. U. Ay</i>	1365
