

Contents

Regular Papers

- Identification of Cascaded Systems with Linear and Quantized Observations** Le Yi Wang, G. Yin, and Cheng-Zhong Xu 1
- Proximal Point Method for Optimal Control Processes Governed by Ordinary Differential Equations** Vadim Azhmyakov and Salvador Noriega Morales 15
- Recursive Identification for Dynamic Systems with Backlash** Ruili Dong, Yonghong Tan, and Hui Chen 26
- Design of Robust Non-Fragile H_∞ Filters for Uncertain Neutral Stochastic Systems with Distributed Delays** Bo Song, Shengyuan Xu, Jianwei Xia, Yun Zou, and Yuming Chu 39
- Delay Distribution Based Robust H_∞ Control of Networked Control Systems with Uncertainties** Chen Peng, Dong Yue, and Yu-Chu Tian 46
- Properties of Parameter-Dependent Open-Loop MPC for Uncertain Systems with Polytopic Description** Baocang Ding 58
- Controller Design Based on Similar Skew-Symmetric Structure for Nonlinear Plants** Yicheng Liu, Tao Zhang, Jingyan Song, and Bin Liang 71

Brief Papers

- Minimizing Operating Points for Way Point Tracking of an Unstable Nonlinear Plant** Guangyu Liu and Ran Yang 84
- A New Tracking Controller for Discrete-Time SISO Non Minimum Phase Systems** Mohsen Ruzbehani 89
- Globally Decentralized Adaptive Backstepping Neural Network Tracking Control for Unknown Nonlinear Interconnected Systems** Weisheng Chen and Junmin Li 96
- On a Robust Synchronization Problem via Internal Model Approach** Weijie Sun and Jie Huang 103
- Output Feedback Stabilization for a Class of Stochastic Non-Linear Systems with Delays in Input** Jun-e Feng and Shengyuan Xu 110
