

Asian Journal of Control

Contents

Regular Papers

- Approximation and Complexity Trade-Off by TP Model Transformation in Controller Design: A Case Study of the TORA System** Zoltán Petres, Péter Baranyi, and Hideki Hashimoto 575
- Fault Tolerant Control Design via Hybrid Petri Nets** Hao Yang, Bin Jiang, Vincent Cocquempot, and Peng Shi 586
- Optimal Control of Fuel Processing System Using Generalized Linear Quadratic Gaussian and Loop Transfer Recovery Method** Huan-Liang Tsai and Jium-Ming Lin 597
- Identification Based Adaptive Iterative Learning Controller** Suhail Ashraf, Ejaz Muhammad, and Amin Al-Habaibeh 607
- Structural Design of Composite Nonlinear Feedback Control for Linear Systems with Actuator Constraint** Weiyao Lan and Dan Wang 616
- Online Identification of Nonlinear Multivariable Processes Using Self-Generating RBF Neural Networks** Karim Salahshoor and Amin Sabet Kamalabady 626

Brief Papers

- Vector Control for Induction Motor Drives Based on Adaptive Variable Structure Control Algorithm** O. Barambones and P. Alkorta 640
- Exact Controllability of Wave Equations with Variable Coefficients Coupled in Parallel** Jieqiong Wu, Shengjia Li, and Shugen Chai 650
- Disturbance Decoupled Fault Reconstruction Using Sliding Mode Observers** Kok Yew Ng, Chee Pin Tan, Rini Akmeliawati, and Christopher Edwards 656
- Delay-Dependent Robust H_2/H_∞ Control for Time-Delay Systems with Polytopic Uncertainty** Man Sun and Yingmin Jia 661
